BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark – these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices – particularly the pre-1941 issues. Washington rolls – dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUMMARY.

MS-60 [illegible]

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. Should have full lustre. These are well [illegible]

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65s are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63, but with the additional feature of deep mirror prooflike surfaces on both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65, but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPER8) Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63, but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

COIN COLLECTORS DOMINATE ANA
BUYING OPPORTUNITIES PREVAIL

The Market in Depth

The **American Numismatic Association**, according to their membership brochure, *"is dedicated to the collector"*. No truer words were evident in Chicago last week at the 100th Anniversary Convention of the **ANA**. This was a coin show where the buyers prevailed, and where the collectors were the primary buyers. You only had to visit Chicago and speak to a few dealers to know that this was true; nearly every bourse table that we visited related a similar story: *"Collectors are buying coins." "Collectors are out in force." "The collector is King."*

Anticipating this, most of the dealers brought appropriate material to the **ANA**, and their judgement was vindicated. Certainly not all dealers had a wonderful show. Many wholesalers, in fact, reported a terrible show - right in line for a buying show that was collector-oriented. The **ANA**, also as expected, did an absolutely wonderful job getting people to attend their centennial bash. If the coin business' health was judged strictly by attendance, the market would appear very bullish. We all know that many collectors attend shows just to look, but many dealers reported writing out more invoices than at any previous **ANA** show; at lower dollar amounts, perhaps, but the collectors generated volume.

When all was said and done, most dealers reported a show somewhere between "good" and "very good"; the nature of their business, inventory, and customer base determined whether the show was below or above expectations. The overall market remains unsettled, and prices remain soft - this too is a characteristic of a buyer's market. The issues that remain fairly stable are also trading somewhat between dealers, showing the importance to trading of a shared concept of market value. Better-dated coins seemed to be quite popular, and "clean" high-grade circ specimens of the better dates appeared on many Want Lists. The success of **sight-seen** trading at the **ANA** further convinced many dealers that the sight-unseen trading systems of the electronic exchanges may face a rocky road ahead.

Just how much business can 20,000 collectors and more than a thousand dealers generate? Despite the remaining weaknesses in the market, Bowers & Merena's official ANA Auction reported sales of $4 million & Superior Galleries' Chicago Sale realized $9.6 million. The millions more spent on the bourse could be a healthy foundation for the coming months.

This Week's Market

CENTS THRU HALVES: The BU roll market was understandably slow this past week as most of the country's leading dealers were in Chicago, for the ANA. Inasmuch as most dealers do not carry bulk rolls to shows, this area usually lies dormant. Nonetheless, several Franklin rolls were discounted resulting in lower Bids.

DOLLARS: Yes, there are still some residual declines across the Dollar charts; however, the ANA proved, once again, that Dollars are one of, if not, the most alluring series of all numismatics. Many dealers reported that collectors were looking for specific issues for their collections. Buyers felt that prices had fallen sufficiently to make purchases at today's levels more attractive. Of course, it was also important that the coin was accurately graded for the price.

PROOF SETS AND MINT SETS: More dealers are joining the ranks of discount sellers of Proof and Mint Sets. The effect is one of lowered Bids scattered across both charts. This is the most minus signs we have seen in these two charts for a long time.

COMMEMORATIVES: The ANA produced a lot of action in the Commem series. This flurry was primarily caused by the Shepherd Collection which brought record prices for numerous high grade issues. Not everybody can afford record-breaking coins, however, collectors quickly realized that MS63 and better coins are also elegant coins. In addition to interest generated by the sale, collectors realize that many issues are at their lowest levels in a very long time. Still, eye-appeal is of major concern.

TYPE: In spite of the minuses seen in the Type chart, this market was very active at the ANA. Dealers and collectors were examining thousands of coins in order to find the ones that met with their approval under inspection. The majority of issues are holding firm as dealers are willing to pay current Bid levels.

GOLD: U.S. Gold (MS63 and better) was very active at ANA. Prices held firm in most cases; some even moved higher. Several High Reliefs changed hands at the $25,000 mark. Also an 1856-S $20 Lib, in MS63, wholesaled at $20,000. This points out that nice coins which had big price tags, were salable if the coins had eye-appeal and were priced commensurate with the actual grade.

EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$372/$377, 1987 1oz-$374/$382, 1/2oz-$186/$195, 1988 1oz-$395/$440, 1/2oz-$186/$210, 1989 1oz-$400/$450, 1/2oz-$190/$230, 1990 1oz-$500/$545, 1/2oz-$295/$350. Proof Silver Eagles are trading at: 1986-$15.25/$16.50, 1987-$14.50/$15.75, 1988-$76/$86, 1989-$14.50/$15.75, 1990-$23.50/$27. BU 1986 Silver Eagles are trading at $11.60/$12.50.

The weekly **COIN DEALER newsletter** (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins **sight seen**. The coins may be certified or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally; they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight-unseen** market which already include consideration of certification costs. Bids for a **sight seen** "raw" coin may be higher or lower than for a **sight-unseen** certified coin due to current market conditions. The **CDN** may not change Bid due to the bidding adjustments of the high bidder but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions; you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 - Unc.,may not have full mint lustre, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - **Choice BU** - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - **Distinct BU** -Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - **Gem BU** -Sharp, full strike. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, NGC, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark – these bring lower prices, "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices – particularly the pre-1941 issues. Washington rolls – dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUMMARY

NEED TO MAIL?

Need to contact America's leading numismatic dealers? Make your advertising and postage dollars count with America's best dealer listing. The company name and numismatist sections of the

1991 Numismatic Dealer Directory™

are available for rental. Since the Directory is fully copyrighted, this is your only source for this proven list of more than 5,000 current names and addresses. And **current** is a promise taken seriously - the data base is updated **daily**. All for only $325 - well below the mailing industry standard of $75/thousand.

To make this offer even more attractive, labels are available in both First Class - Zip Code order or Presorted for Third Class - Basic Bulk Rate mailings (you can save more than $425 over First Class postage rates!).

YES, I want to order mailing labels for the 5,000+ names from the 1991 Numismatic Dealer Directory. I understand that my $325 fee entitles me to only one usage of these names. _____signature

MS-60 [illegible]

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. Should have full lustre. These are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtuallly clean appearing face and breast feathers. MS-65s are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces on both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65, but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63 but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

Our 29th year...

MARKET STILL SEEKING EQUILIBRIUM
ARE BARBER DIMES UNDERPRICED?

The Market in Depth

A long-time dealer recently confessed to us of his long-time love affair with MS65 Barber Dimes. This was the very first series of "rare coins" that he had tried to complete, and he was filled with memories of the frustrating efforts at assembling a Gem set. Among his other observations on today's coin market, he noted that MS65 Bid on Barber Dimes seemed *"awfully cheap"* to him at these levels.

As our dealers well know, *"Cheap"* is very relative in the coin market, and we thought to have a look at a bit of the Bid history of the Barber Coins. All Bids below are from the **CDN** issue of the last week of August of their respective years.

Barber	8/81	8/88	8/89	8/90	8/91
Dime	$1,000	$2,000	$2,000	$3,000	$ 860
Quarter	$1,600	$3,300	$3,200	$3,400	$1,225
Half	$2,750	$4,100	$4,500	$6,000	$2,600

A few simple observations about these Bids tells us a great deal about the current coin market. Bid on these Gem specimens is now down noticeably from a decade ago. Enormous volatility in pricing over that decade meant that great profits could have been made, or great losses suffered. The *relative* levels, however, indicate that professionals shared reasonably accurate ideas about value and rarity then as well as now. Over the past year, Bids on MS65 Barber Types have declined substantially. How much? Dime Bid has declined 71%, Quarter Bid has declined 64%, and Half Bid has declined 57%. Barber Dimes really have been hit harder than the Quarters and Halves.

Perhaps part of the answer can be found in the population reports for certified MS65 specimens. The population reports are an excellent *guide* to *relative* populations on the higher grade specimens, and they are useful tools in deciphering pricing trends. According to the August 1991 reports, the following have been certified.

Dime	PCGS-738	NGC-483	Total-1221
Quarter	PCGS-695	NGC-378	Total-1073
Half	PCGS-356	NGC-208	Total- 564

We cannot predict whether Bid on MS65 Barber Dimes will fall further or turn around, but we will mention that in coin cycles, the coins that get hit the hardest often yield the greatest profits to the dealers who have the contrarian fortitude to buy in at the bottom.

This Week's Market

CENTS THRU HALVES: BU roll buyers are back and the market is more stable than it has been over the last couple of weeks. Most of the Bidding activity is taking place at current Bid levels, yet, there are a few increases across the chart.

DOLLARS: Several plus signs can be found in the Dollar charts this week as dealers are looking for various dates for their customers. The increases are primarily located in the MS63 and better columns; these changes can be mostly categorized as coins which are Bid less than $1,000. A few rare date Peace Dollars have become available (in high grades) at discounted levels.

PROOF SETS AND MINT SETS: Mint Sets are steady at today's levels with little discounting taking place. Proof Sets are another story. Several issues have fallen as dealers are thinning down their inventories in specific areas:

COMMEMORATIVES: Even though some Commem issues are still drifting to lower Bid levels, it appears that some dealers are occasionally jumping in and trying to make opportunistic purchases of coins which have fallen to seemingly reasonable levels. Nonetheless, some better issues are still meeting with resistance and are being offered at discounts.

TYPE: We are finding a few more sellers this week in the Type market. Selling pressure is causing the majority of Bid changes to wander lower. In some cases, Bidding support is just nowhere to be found, so when coins are offered at the current levels, Bids plunge spectacularly.

GOLD: Mint State Gold has been strengthening for the last three weeks. Until this week, most of the changes have occurred in the MS63 or better grades, however, some of the MS60 issues have now joined in the spotlight. This, despite the fact that gold bullion continues to flounder.

EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$373/$378, 1987 1oz-$374/$380, 1/2oz-$185/$193, 1988 1oz-$390/$430, 1/2oz-$185/$210, 1989 1oz-$400/$450, 1/2oz-$188/$230, 1990 1oz-$495/$545, 1/2oz-$295/$335. Proof Silver Eagles are trading at: 1986-$15.50/$16.50, 1987-$14.50/$15.75, 1988-$74/$80, 1989-$14.25/$15.75, 1990-$24.50/$27. BU 1986 Silver Eagles wholesale at $11.50/$12.50.

A weekly comparison of ratios of certified coin Bid levels relative to CDN Bid levels (as 100%) sampled from 10 U.S. coin series (2 grades each). Chart reports the lowest and highest percentages found among the 20 comparisons, and the average of the 20 comparisons. All %'s relative to CDN as 100% base level. Data from latest issues of CDN, Monthly Supplement, and Certified Coin Dealer newsletter. For specific certified Bid levels, please refer to CCDn. Pre-1986 ANACS papers may bring considerably lower bids. Prices represent sight unseen Bids. The weekly **COIN DEALER newsletter** (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins **sight-seen**. The coins may be certified or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally; they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight-unseen** market, which already include consideration of certification costs. Bids for a **sight-seen** "raw" coin may be higher or lower than for a **sight-unseen** certified coin due to current market conditions. The **CDN** may not change Bid due to the bidding adjustments of the high bidder, but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions; you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins

MS-60 - Unc.,may not have full mint lustre, may be dull toned or spotted. May be the worst possible example but shows no wear or damage

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike. Above average coins

MS-64 - Distinct BU -Far and away nicer than MS-63, yet, a near miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible

MS-65 - Gem BU -Sharp, full strike. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark – these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices – particularly the pre-1941 issues. Washington rolls – dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUMMARY

NEED TO MAIL?

Need to contact America's leading numismatic dealers? Make your advertising and postage dollars count with America's best dealer listing. The company name and numismatist sections of the

1991 Numismatic Dealer Directory™

are available for rental. Since the Directory is fully copyrighted, this is your only source for this proven list of more than 5,000 current names and addresses. And **current** is a promise taken seriously - the data base is updated **daily**. All for only $325 - well below the mailing industry standard of $75/thousand.

To make this offer even more attractive, labels are available in both First Class - Zip Code order or Presorted for Third Class - Basic Bulk Rate mailings (you can save more than $425 over First Class postage rates!).

YES, I want to order mailing labels for the 5,000+ names from the 1991 Numismatic Dealer Directory. I understand that my $325 fee entitles me to only one usage of these names. _____signature

[illegible] Uncirculated [illegible] However [illegible]

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike [illegible] have full lustre. These are well above average [illegible].

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. *Must have eye appeal.*

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. *Must have eye appeal.*

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same character[illegible] as the MS-63 but with the additional feature of [illegible] mirror prooflike surfaces on both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65, but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPER8) Will be 100% fully struck and virtually perfect in all other respects Prices of such seldom encountered specimens are based upon the merits of each coin They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for "typical" coins These usually average MS-63, but may also include some MS-60 and MS-65 examples For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

MINT GOLD TYPE ADVANCES
GOLD BULLION ASTONISHES

The Market in Depth

The performance of Mint State Gold Type coins, the bulwark of many a coin shop for many a year, has recently been improving despite lower bullion levels. Is this series, so very important to the well-being of so many coin dealers, understood? If anyone really understood the price gyrations, they would certainly keep it quiet, but we all need to try. Insular dealers, with no interest in world events or economic affairs, should have learned from the last several years that the sun doesn't revolve around coin shops, even if coins are the center of our universe.

A decade ago, when the world was simple, and Russians acted like Russians, gold was easy to understand. Russia would do something dangerous, and bullion would rise; our Treasury Dept. would do something stupid (as in double-digit inflation), and bullion would rise; coin dealers would open their front doors, and bullion would rise. Those were the gold old days.

Now what? The U.S. stock market crashes in late 1987, and gold climbs about $20. The Japanese market plunges in early 1990, and gold begins an $80 decline. As tensions mount in the Middle East in 1990, gold climbs $70; Iraq invades Kuwait and gold drops $30. U.S. forces mass in the Gulf, and gold climbs $40; the Persian Gulf War starts and gold drops another $20. Hard-line Soviets semi-stage a coup, and gold drops again. They just don't make international tension like they used to.

Perhaps gold's long-term waffling came from the strength of the Dollar relative to other currencies, or the rates of return that were "guaranteed" elsewhere. Why buy risky gold when you could earn higher rates in 'junk bonds' or at the Savings & Loan? Perhaps if we knew how much Russian gold was being converted into hard currencies (their traders are *very professional* - witness their tactical purchases after the market dropped on the rumor of massive Russian sell-offs.) Perhaps the reasons lie in the fears that our recession would turn even darker. Could gold (along with rare coins) be reacting to a simple drop in demand, as former purchasers use their 'discretionary' capital to pay off debts instead? It appears that many Americans had battened down the hatches until they were sure that the storm had passed. When the sun begins to shine again on the 'New World Order', will the purse strings loosen, or have new habits been formed? It might make a substantial difference to us all.

This Week's Market

CENTS THRU HALVES: Activity in the BU roll market is better than average as various dealers still advertise their needs. The majority of buys are at current Bid levels with a few exceptions. A couple Washington Quarter rolls (1954-S & 55-D) and a few Walker rolls (1941, 42, 43, & 45) have advanced this week. There have also been a few declines, mostly in the Franklin series.

DOLLARS: The Dollar market continues to undergo adjustments depending on the specific needs of the dealer community. The charts are filled with pluses and minuses based on these needs. For the most part, dealers are content with movement in this area as it appears to be healthy contingent upon trading activity.

PROOF SETS AND MINT SETS: The Proof Set chart depicts general stability with just a few issues changing this week; decreases outnumber increases by just a little. Mint Sets are another story, however. Many minuses cover the Mint Set chart as sellers clearly outnumber buyers.

COMMEMORATIVES: The number of changes in the Commem chart this week is excessive compared to the last couple of weeks. And the declines are still in charge of the market. The inconsequential buyer support which we see in the marketplace is not enough to overpower the large inventories available.

TYPE: Type coins remain quite active, however, the mass of the changes this week are to the downside. Some dealers feel that various issues are still too high, as their discounted offers to sell stress. Other dealers think that Type is healthy as long as coins are trading at today's levels. Proof Type appears to be a little stronger than Mint State.

GOLD: Mint State U.S. Gold remains the most positive area of the whole market. The bulk of the Bids are on the rise in various grades, with most of the remainder stable at current levels. Just a couple declines keeps this chart from appearing hot.

EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$368/$374, 1987 1oz-$370/$376, 1/2oz-$180/$190, 1988 1oz-$390/$430, 1/2oz-$185/$208, 1989 1oz-$405/$450, 1/2oz-$188/$230, 1990 1oz-$500/$545, 1/2oz-$270/$330. Proof Silver Eagles are trading at: 1986-$15.25/$16.25, 1987-$14.50/$15.50, 1988-$71/$76, 1989-$14/$15, 1990-$23/$25. BU 1986 Silver Eagles wholesale at $11.25/$12.50.

A weekly comparison of ratios of certified coin Bid levels relative to CDN Bid levels (as 100%) sampled from 10 U.S. coin series (2 grades each). Chart reports the lowest and highest percentages found among the 20 comparisons, and the average of the 20 comparisons. All %'s relative to CDN as 100% base level. Data from latest issues of CDN, Monthly Supplement, and Certified Coin Dealer newsletter. For specific certified Bid levels, please refer to CCDn. Pre-1986 ANACS papers may bring considerably lower bids. Prices represent sight unseen Bids. The weekly **COIN DEALER newsletter** (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins **sight seen**. The coins may be certified or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally; they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight-unseen** market, which already include consideration of certification costs. Bids for a **sight seen** "raw" coin may be higher or lower than for a **sight-unseen** certified coin due to current market conditions. The **CDN** may not change Bid due to the bidding adjustments of the high bidder, but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer to Dealer transactions; you should expect to pay a premium above Ask when purchasing coins in a retail transaction, you may also commission a Dealer for your purchases.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins

MS-60 · Unc.,may not have full mint lustre, may be dull, toned or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 · Choice BU · Brilliant Unc (may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 · Distinct BU ·Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 · Gem BU ·Sharp, full strike. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, NGC, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. For listed Bid prices of coins certified by ANACS, NCI, PCGS, and NGC, please refer to *the Certified Coin Dealer newsletter*

MS-63 CHOICE UNCIRCULATED: Will have [illegible] bag marks, may show only a slight weakness [illegible] full lustre. These are well above average [illegible]

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65s are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63, but with the additional feature of [illegible] mirror prooflike surfaces on both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65, but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for 'typical' coins. These usually average MS-63, but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

BUYING OPPORTUNITIES CREATED BY LOWER BID LEVELS
TIMING IS THE APPROPRIATE WATCHWORD

The Market in Depth

The past several months has seen the marketplace, in many ways, virtually fall to pieces. Dealers have had heavy inventories and little cash for purchasing; and customers have been *waiting* on the sidelines. Thus, the market has fallen anywhere from 25% - 40% in the last year-and-a-half depending on whose figures you analyze. The **CCDn Coin Market Index** that we maintain in the *Bluesheet* currently stands at **745.15**, down from 1000 in January of 1990. The **CMI**, tracking over 13,000 issues, is a broad-based indicator of the overall health of the market.

Declines in Bid for generics have certainly contributed to some of this decline, but rare coins have turned in an erratic performance as well. Some selected, premium-quality rarities have established world records, while others have seen their value halve. During this period of generally declining Bids, some truly rare coins have changed hands at auction at surprisingly low levels compared to pre-sale estimates. Some consignors still cannot adjust to the new reality, and many lots are still 'selling' to the reserve.

Yet, on the other hand, dealers have found that some of their more astute numismatic customers have taken advantage of the downturn in the marketplace to buy selected coins for their collections. This now seems to be the focus of the overall market. As long as Bids are going to languish at current levels, or fall even lower, *selected* material is going to be sought by those who have confidence in the long-term outlook of numismatics.

This is as it should be. There are buyers and there are sellers; believers and non-believers. There are those who buy at the top of the market and find it impossible to ever make a profit, while others buy near the bottom of the market where it is only a matter of time before they are in a profit position. The majority of dealers with whom we have spoken lately feel that we are very near the bottom of the market. They are seeing many of their customers re-entering the market at this time, albeit slowly for the most part.

Eventually, this increased demand will have a snowballing effect as the entire market catches fire in a new cycle. First it starts with selected coins in selected series. Then it reaches into new series and other issues join in as the heat begins to exceed the temperature of the weather. For those who are stepping lightly into the market right now, the rewards will be greater than for those who wait until the fire is raging.

This Week's Market

CENTS THRU HALVES: The BU roll market still has some buyers who are willing to pay Bid for various dates; however, the majority of Bid changes this week are declines as a result of dealers trying to sell rolls which are not on want lists at previous Bids. Roosevelt Dimes have taken the biggest number of hits, followed by the Lincoln Cent series.

DOLLARS: The Dollar chart indicates a solid level of activity throughout this series. Yes, there are minus signs here and there, but there are also a goodly supply of increases. This market is healthy and there are dealers trading Dollars for inventory or for their customers.

PROOF SETS AND MINT SETS: Discounted sells outnumber Bid buys by a long-shot. There are numerous minus signs in the Proof Set chart due to lowered sells, while the buyers are trying to purchase sets at under Bid levels. The Mint Set chart also contains several minus signs, although plus signs are just as plentiful.

COMMEMORATIVES: In speaking with dealers, we have found many of them are in agreement concerning the Bid levels of most Silver Commems. "They are extremely cheap at this point." Many dealers are buying various issues which meet their personal grading criteria at these current levels. However, there are also some issues which go unsold, thus causing the Bids to fall further.

TYPE: The Type market appears to be a little stronger this week, even though minus signs surface intermittently across the charts. More dealers seem to have want lists which include specific Type issues than in recent weeks. The Barber series has gathered some strength the last several days.

GOLD: Mint State U.S. Gold is still fairly strong as the majority of Bid changes are to the upside. Even where minus signs appear, the declines are mostly moderate. In the area of circulated gold, there are more sellers than buyers at current levels.

EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$369/$379, 1987 1oz-$371/$380, 1/2oz-$180/$189, 1988 1oz-$385/$425, 1/2oz-$185/$208, 1989 1oz-$395/$445, 1/2oz-$188/$230, 1990 1oz-$490/$540, 1/2oz-$270/$330. Proof Silver Eagles are trading at: 1986-$14.50/$17, 1987-$14.25/$16, 1988-$71/$82, 1989-$14/$15.75, 1990-$22.50/$25. BU 1986 Silver Eagles wholesale at $11/$12.50.

Use the Indicator to survey the entire market, not just a single issue. However, knowing these %'s will enable the reader to apply these numbers to specific CDN Bids in order to determine current market for certified coins.

A weekly comparison of ratios of certified coin Bid levels relative to CDN Bid levels (as 100%) sampled from 10 U.S. coin series (2 grades each). Chart reports the lowest and highest percentages found among the 20 comparisons, and the average of the 20 comparisons. All %'s relative to CDN as 100% base level. Data from latest issues of CDN, Monthly Supplement, and Certified Coin Dealer newsletter. For specific certified Bid levels, please refer to CCDn. Pre-1986 ANACS papers may bring considerably lower bids. Prices represent sight unseen Bids. The weekly **COIN DEALER newsletter** (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins **sight seen**. The coins may be certified or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally; they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight-unseen** market, which already include consideration of certification costs. Bids for a **sight seen** "raw" coin may be higher or lower than for a **sight-unseen** certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder, but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions; you should expect to pay a premium above Ask when purchasing coins in a retail transaction, you may also commission a Dealer for your purchases.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 - Unc.,may not have full mint lustre, may be dull, toned or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU - Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU - Sharp, full strike. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, NGC, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. For listed Bid prices of coins certified by ANACS, NCI, PCGS, and NGC, please refer to *the Certified Coin Dealer newsletter*.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark – these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices – particularly the pre-1941 issues. Washington rolls – dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUMMARY

Announcing the Secret of America's Lowest Priced Slab

New PCI CAPSULE® - *. . . Destined To Make Coin Slabbing Economical for Everyone*

The Secret Revealed: As recently reported in the news, Hallmark Grading Services, Inc., has been disolved and will no longer grade coins. On April 16, 1991, Photo-Certified Coin Institute (PCI) acquired the entire assets of Hallmark Grading Service (except the name). In the deal we got virtually everything but the kitchen sink. . . including the technology, hardware, software computer programs and the molds used to produce their familiar coin slab now seen in the marketplace.

On June 1, 1991, the newly improved PCI CAPSULE® name replaced the old Hallmark logo. PCI will continue with the same format, bar coding and coin attribution (e.g. varieties, mintages, PQ status, etc.) that Hallmark developed for collectors, including their intricate anti-counterfeiting measures.

The best part is that the new CAPSULE® slab will cost substantially less, both in manufacturing and processing time, to evaluate coins. And, because of these technological advances, PCI will now be charging only $6 per coin to grade, authenticate and encapsulate all U.S. coins in the new CAPSULE® slab.

A few years ago, one of the owners of another slab grading service stated that "someday" he could forsee slab fees as low as $5 or $6. Today, that projection has become reality with the shortest turn around guarantee in history (6 working days after we receive your coins).

At PCI, we have always relied upon 3 basic business practices that you can count on:

(1) **to process** your coins at the lowest rates & shortest turnaround time. . . in history,

(2) **to remain open** to the general public without favoritism to any dealer or individual,

and (3) **to provide the most** technologically consistent and accurate grading service possible.

6 COIN MINIMUM, NO MAXIMUMS, NO HIDDEN COSTS . . . to take advantage of this new service please fill out the actual submittal form shown below. ***Note:*** If your coin(s) are cleaned, whizzed, discolored or otherwise not eligible for slabbing, PCI will still grade, authenticate & issue a formal grading report for each coin.

We also accept foreign coins, errors and colonials that may be slabbed in our $10 photoslab. You may mix or match the $6.00 and $10.00 services.

Look for this symbol to save you money!

MS-60 UNCIRCULATED [illegible]

MS-63 CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. Should have full lustre. These are well above average [illegible]

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. *Must have eye appeal*

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. *Must have eye appeal*

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63, but with the additional feature of deep mirror prooflike surfaces on both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65, but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for 'typical' coins. These usually average MS-63 - but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

PLUS SIGNS REAPPEARING
SILVER COMMEMS & MORGANS SHOW INCREASES

The Market in Depth

Maybe it's autumn. Just maybe it's the snap of the first football, or the first hint of color in the leaves, or perhaps even the laying-in of coins to prepare for winter's hibernation. Whatever the cause, we like the results. There has been a noticeable increase in activity in the coin market these last two weeks. There are many plus signs in the Silver Commemoratives and Morgan Dollar charts, representing a large number of relatively small increases. This is exactly what we like to see, since we believe that coin market advances should be based on breadth, not volatility.

Along with these signs of increased strength in selected areas, we are continuing to witness selected declines based primarily on discounted sells. Within limits, this too is a healthy sign and is adding to the level of market activity. What remains important is to keep merchandise moving, and specifically, to see inventory moving into the collections of customers. It does the coin business no good to have material remain unsold because of unrealistic expectations of value. If value has declined, better to sell, take the loss, and reinvest those precious inventory dollars into items that will sell more quickly and turn profits.

The market will soon enough test whether these plus signs are the first indication of the market bottom having been reached. The Long Beach Exposition is just around the corner. Long Beach normally gives dealers the strongest show possible for the given market conditions, and even a "bad" market has been known to produce some "decent" Long Beach shows. The ANA Convention this summer had all of the whoopla surrounding the 100th Anniversary of the ANA to attract extra crowds. At Long Beach, the major pull will be just the coins and current pricing levels. It will be interesting to see, and even more interesting to be there. October 10-13, and you know the place.

The Long Beach show will be preceded by the G. Lee Kuntz Collection Sale, to be held by Superior Galleries, Oct 6-8. Superior has secured still another superb collection of Large Cents. Those specialists who follow the Early Coppers have made it something of a tradition to make the annual pilgrimage to Beverly Hills for these wonderful sales. With more than 1200 lots of Large Cents, the collectors are preparing themselves for a major event. In addition to the superb selection that one expects from a major sale, there are also specialty collections of Overton Halves, Bolender Dollars, and California Fractional Gold.

This Week's Market

CENTS THRU HALVES: Dealers in the BU roll market are finding that activity is mostly steady at current levels in the Lincoln Cent, Jefferson Nickel, Washington Quarter, and all the half dollar series. But the Mercury and Roosevelt Dime series are being discounted with no potential buyers in sight. Some of these rolls seem quite reasonable to the casual observer.

DOLLARS: There are a few more minus signs this week in the MS64 & 65 columns (Morgans) than there have been the past several weeks. Nonetheless, this series continues to attract enough buyers and sellers to make this an inviting area of the market. Supply and demand keep Dollars the focal point of most dealer want lists.

PROOF SETS AND MINT SETS: Proof Sets are most definitely on a downward slide. Mostly sellers are being monitored on the teletypes while buyers are strictly bargain-hunting. The majority of Mint Sets manage to hold their previous levels, but there are a handful of minuses visible.

COMMEMORATIVES: The Silver Commem market is displaying a multitude of increases this week, even if they are nominal rises. Some dealers seem to be saying that prices are too cheap and they are willing to stock-pile various issues at today's Bid levels. Gold Commems are holding steady at today's Bids.

TYPE: The Type charts are becoming more positive as we approach the last quarter of the year. Many dealers are gearing up for the Long Beach Show in early October, and some feel that this show will tell the tale for the balance of the year. If Type is going to advance from today's levels, dealers want to position themselves with more Type coins in stock.

GOLD: This is the first week in several that Mint State U.S. Gold has shown a tendency to lower levels. However, even now, there are still enough plus signs to give this area a positive appeal. What is of concern to most dealers is the fact that the price of bullion is slipping lower.

EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$363/$372, 1987 1oz-$365/$375, 1/2oz-$179/$188, 1988 1oz-$385/$425, 1/2oz-$180/$205, 1989 1oz-$395/$445, 1/2oz-$195/$235, 1990 1oz-$485/$520, 1/2oz-$265/$315. Proof Silver Eagles are trading at: 1986-$14.25/$17, 1987-$14/$16.50, 1988-$70/$83, 1989-$14/$16, 1990-$22.50/$25.50. BU 1986 Silver Eagles wholesale at $11/$12.

A weekly comparison of ratios of certified coin Bid levels relative to CDN Bid levels (as 100%) sampled from 10 U.S. coin series (2 grades each). Chart reports the lowest and highest percentages found among the 20 comparisons, and the average of the 20 comparisons. All %'s relative to CDN as 100% base level. Data from latest issues of CDN, Monthly Supplement, and Certified Coin Dealer newsletter. For specific certified Bid levels, please refer to CCDn. Pre-1986 ANACS papers may bring considerably lower bids. Prices represent sight unseen Bids. The weekly **COIN DEALER newsletter** (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins **sight seen**. The coins may be certified or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally; they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight-unseen** market, which already include consideration of certification costs. Bids for a **sight seen** "raw" coin may be higher or lower than for a **sight-unseen** certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder, but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions; you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 - Unc., may not have full mint lustre, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU -Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU -Sharp, full strike. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark – these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices – particularly the pre-1941 issues. Washington rolls – dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUMMARY

M[illegible] [illegible] However no [illegible] will be bag [illegible] may not have full [illegible]

MS-63 (CHOICE UNCIRCULATED) Will have [illegible] bag marks, may show only a slight weakness in strike. [illegible] have full lustre. These are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtuallly clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces on both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65, but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPER8) Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63 - but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

ACTIVITY PICKING UP
PRICE ADJUSTMENTS CONTINUE

The Market in Depth

It's still too soon to talk about a market "recovery", but there is good news coming out of the marketplace. Many recent telephone conversations have found dealers expressing greater optimism about a possible turnaround. A good part of their enthusiasm is based on their observations that they are starting to see additional collectors returning to their shops. Nobody is bragging about business yet, but cautious optimism is definitely evident.

Most dealers, if not all, want the market to turn around, and positive signs are actively sought (for buying in at the bottom). Customers are looking for signs of the market turn-around as well. The most accurate signs, however, are provided by the customers themselves; by their presence in shops and at auctions, and by the size of the checks that they write. We are receiving reports that collectors' spending is *starting* to rise, and with it the spirits of the dealers.

The cyclical nature of the coin business is no secret, to be sure, but even with experience it is still hard sometimes to look at the market objectively. During an up-market, everyone wants to believe that prices will continue to rise forever. During declines, dealers and collectors together begin to wonder if good times will ever return. Perhaps these are inevitable consequences of the inventory-based nature of the business and the hobby. Ownership of items whose value fluctuates outside of your control can certainly lead to a little emotion - and the bigger the movements, the greater the emotions.

Frankly, it may not take that much to get another market rally started. Long-term collectors and dealers both benefit from a rally, and both are hurt by a decline. This recovery will depend upon collectors taking the first steps, as "investors" seem to have ceased to be a market force of any consequence. To fully recover, prices will need to reach appropriate pricing levels in order to sustain collector interest. Dealers got hurt buying in advance of investor possibilities instead of collector certainty. When it became obvious that investor demand was gone and that collector demand would not, **could not**, sustain those price levels, prices had to drop. When collectors start buying in bigger numbers again, prices will rise. We are beginning to see signs that this is happening, and a little good news is just what this market needs heading into Long Beach.

This Week's Market

CENTS THRU HALVES: The BU roll market is mixed this week. A few plus signs, along with the numerous issues for which dealers are willing to pay current levels, more than offsets the minus signs in this week's charts. The minus signs are mostly found in Lincoln Cents (1967-1973) and Franklin Halves (1955-1962).
DOLLARS: Lots of potential buyers keep the Dollar market at the forefront of activity this week. Granted, there are still some sellers of various coins which are not on want lists at the previous levels (indicated by minus signs), but the name of the game is buying and selling; some coins are in favor, while some others are out. As long as there is activity in both directions, then the market is considered to be in a healthy state.
PROOF SETS AND MINT SETS: Very little activity was monitored this past week for Proof and Mint Sets as the discounts of the previous weeks have slowed significantly. Just a few changes in each chart will let you know that some business is taking place at these levels.
COMMEMORATIVES: Activity in the Commem market has picked up considerably over the last couple of weeks. There are plenty of plus signs in the MS-64 and 65 columns of Silver Commems, while Gold Commems even show some solid interest. Where plus signs are not shown, many of the Silver issues are wanted at current Bids.
TYPE: Despite the fact that Bid changes are not readily apparent, the Type market is bolstered by numerous dealers trying to purchase coins at the current levels. Some dealers are trying to stock-up in anticipation of Long Beach, while others are trying to fill present want lists. For whatever reason, potential sellers will be glad there are buyers at today's levels.
GOLD: The Gold market has responded to higher bullion this week with numerous plus signs in the circulated columns. Yet, the Mint State grades (MS-60 to MS-64) indicate several declines due to specific offers to sell at lower levels. The only real positive news is that the MS-65 column is covered with pluses as demand is stronger for the high grades.
EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$368/$376, 1987 1oz-$370/$380, 1/2oz-$180/$191, 1988 1oz-$395/$430, 1/2oz-$180/$205, 1989 1oz-$400/$440, 1/2oz-$195/$235, 1990 1oz-$490/$540, 1/2oz-$280/$320. Proof Silver Eagles are trading at: 1986-$14/$15.50, 1987-$14/$15.50, 1988-$68/$78, 1989-$14.25/$15.50, 1990-$22/$25.50. BU 1986 Silver Eagles wholesale at $11/$12.

A weekly comparison of ratios of certified coin Bid levels relative to CDN Bid levels (as 100%) sampled from 10 U.S. coin series (2 grades each). Chart reports the lowest and highest percentages found among the 20 comparisons, and the average of the 20 comparisons. All %'s relative to CDN as 100% base level. The weekly **COIN DEALER newsletter** (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins **sight seen**. The coins may be certified or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally; they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight-unseen** market, which already include consideration of certification costs. Bids for a **sight seen** "raw" coin may be higher or lower than for a **sight-unseen** certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder, but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE. The prices in this newsletter are from Dealer-to-Dealer transactions; you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 - Unc., may not have full mint lustre, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems!) will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU - Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU - Sharp, full strike. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark – these bring lower prices: "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices – particularly the pre-1941 issues. Washington rolls – dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUMMARY

New PCI CAPSULE® - *. . . Destined To Make Coin Slabbing Economical for Everyone*

The Secret Revealed: As recently reported in the news, Hallmark Grading Services, Inc., has been disolved and will no longer grade coins. On April 16, 1991, Photo-Certified Coin Institute (PCI) acquired the entire assets of Hallmark Grading Service (except the name). In the deal we got virtually everything but the kitchen sink. . . including the technology, hardware, software computer programs and the molds used to produce their familiar coin slab now seen in the marketplace.

On June 1, 1991, the newly improved PCI CAPSULE® name replaced the old Hallmark logo. PCI will continue with the same format, bar coding and coin attribution (e.g. varieties, mintages, PQ status, etc.) that Hallmark developed for collectors, including their intricate anti-counterfeiting measures.

The best part is that the new CAPSULE® slab will cost substantially less, both in manufacturing and processing time, to evaluate coins. And, because of these technological advances, PCI will now be charging only $6 per coin to grade, authenticate and encapsulate all U.S. coins in the new CAPSULE® slab.

A few years ago, one of the owners of another slab grading service stated that "someday" he could forsee slab fees as low as $5 or $6. Today, that projection has become reality with the shortest turn around guarantee in history (6 working days after we receive your coins).

At PCI, we have always relied upon 3 basic business practices that you can count on:

(1) **to process** your coins at the lowest rates & shortest turnaround time. . . in history,
(2) **to remain open** to the general public without favoritism to any dealer or individual,
and (3) **to provide the most** technologically consistent and accurate grading service possible.

6 COIN MINIMUM, NO MAXIMUMS, NO HIDDEN COSTS . . . to take advantage of this new service please fill out the actual submittal form shown below. ***Note:*** If your coin(s) are cleaned, whizzed, discolored or otherwise not eligible for slabbing, PCI will still grade, authenticate & issue a formal grading report for each coin.

We also accept foreign coins, errors and colonials that may be slabbed in our $10 photoslab. You may mix or match the $6.00 and $10.00 services.

Look for this symbol to save you money!

MS-63 (CHOICE UNCIRCULATED) Will have [illegible] bag marks, may show only a slight weakness of strike. [illegible] have full lustre. These are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtuallly clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63, but with the additional feature of deep mirror prooflike surfaces on both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65 but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63 - but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

the COIN DEALER newsletter

Our 29th year...

Single copy price $3.50 Vol. XXIX No. 40 October 4, 1991 *. . .a Friday morning report on the Coin Market*

LONG BEACH HERE AGAIN
COLLECTOR'S MARKET TO DOMINATE?

The Market in Depth

The autumn Long Beach Show is upon us once again, and dealers are expressing cautious optimism about the Show *and* the coin market. Dealers trust the Long Beach Show to deliver the best that the market can offer. The big question remains, "What is the market capable of offering this autumn?". One thing is certain: Dealers will be bringing inventory selected to attract collectors. After the ANA Convention, there shouldn't be any question in the minds of dealers - this is *the year of the collector*.

Therefore, the logical question should be, "What is it that collectors want?". There are probably as many answers as there are collectors. The decision on what parts of inventory to bring is critical to success at any show. We know of several long-time dealers who make their decisions based of what their *Long Beach customers* usually want to buy. This kind of knowledge of the market in general, and of repeat customers in specific, can be crucial to success - but then again, doesn't a dealer who knows his material and his customers deserve success?

While we expect to see a lot more of those $1,000 and below coins on display in showcases, what does that mean to the specialist who has made his living wholesaling the more valuable coins? Few dealers are anxious to stock items that may not sell for many months, even if current prices seem unreasonably low. Without a "hot" customer for the "big-ticket" material, the possibilities of large profits fade before the certainties of carrying costs and volatile market values. After the Long Beach Show, we will certainly have a better feel for the market for these major items.

Readers will notice some changes to the **CDN** format starting with this issue, marking another in the long line of improvements made to the **Coin Dealer Newsletter**. As the coin market has progressed, the Greysheet has grown right along with it. We have repositioned a few charts to make it even more useful to you. We have added some new Commems and brought all of the Commemorative coinage together onto Page Two. We have also repositioned the totals for the 50 and 144 piece Silver Commem Sets to make them easier to use. All of the BU Rolls can now be found on Page Three. Page Three will also contain a new feature that we think you will find quite useful - a graph showing the pricing history of selected coins since 1980. We have also added totals for complete sets of Walking Liberty Half Dollars on Page Ten.

This Week's Market

CENTS THRU HALVES: The BU roll market is mostly steady this week. The majority of Bidding activity being monitored is taking place at current levels, and there is hardly any discounting being reported.

DOLLARS: Various dates within the Dollar columns (MS-63, 64, & 65) continue to fluctuate according to the needs of the individual dealers. If specific coins are needed for customers and they are not found on sell lists, then the potential buyer must let it be known that he is in the market for these issues--he usually does this by offering to pay at or over the then current Bids. And if dealers wish to sell coins which are currently out of favor, they will usually offer them at Bid or less. Overall, the Dollar market appears to have a suitable ratio of gains to losses.

PROOF SETS AND MINT SETS: Stable is the best way to describe Proof and Mint Sets this week. Few changes have taken place as most dealer buy lists specify today's Bids. Discounted offers to sell are few and far between.

COMMEMORATIVES: Commems are steady to higher as we go into Long Beach week. More buyers are willing to pay the current levels, while some are even aggressively seeking specific issues at higher levels. The few issues which fell this week are minutely lower.

TYPE: The Type market is mostly firm as the number of plus signs is nearly equal to the minuses. Combined with the number of issues which are wanted at current levels, the Type market looks moderately healthy at this time.

GOLD: Judging by the number of declines this week, Mint State Gold is not high on want lists at current Bid levels. More dealers are interested in selling than buying, unless they can purchase specific coins at discounts. Keep in mind, this is one area that is used occasionally to raise needed funds on a moment's notice.

EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$372/$382, 1987 1oz-$373/$382, 1/2oz-$180/$188, 1988 1oz-$380/$415, 1/2oz-$180/$205, 1989 1oz-$390/$425, 1/2oz-$220/$250, 1990 1oz-$485/$520, 1/2oz-$265/$310. Proof Silver Eagles are trading at: 1986-$14/$15, 1987-$14/$15, 1988-$69/$79, 1989-$14/$15, 1990-$22/$24. BU 1986 Silver Eagles wholesale at $11/$12.25.

Use the Indicator to survey the entire market, not just a single issue. However, knowing these %'s will enable the reader to apply these numbers to specific CDN Bids in order to determine current market for certified coins.

A weekly comparison of ratios of certified coin Bid levels relative to CDN Bid levels (as 100%) sampled from 10 U.S. coin series (2 grades each). Chart reports the lowest and highest percentages found among the 20 comparisons, and the average of the 20 comparisons. All %'s relative to CDN as 100% base level. Data from latest issues of CDN, Monthly Supplement, and Certified Coin Dealer newsletter. For specific certified Bid levels, please refer to CCDn. Pre-1986 ANACS papers may bring considerably lower bids. Prices represent sight unseen Bids. The weekly **COIN DEALER newsletter** (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins **sight-seen**. The coins may be certified or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally; they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight-unseen** market, which already include consideration of certification costs. Bids for a **sight seen** "raw" coin may be higher or lower than for a **sight-unseen** certified coin due to current market conditions. The **CDN** may not change Bid due to the bidding adjustments of the high bidder, but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions; you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

COMMEMORATIVES

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, NGC, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. For listed Bid prices of coins certified by ANACS, NCI, PCGS, and NGC, please refer to *the Certified Coin Dealer newsletter*.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the rolls in the late 50's tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full steps Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUPPLEMENT. Mercury & Walker singles are on Page 10.

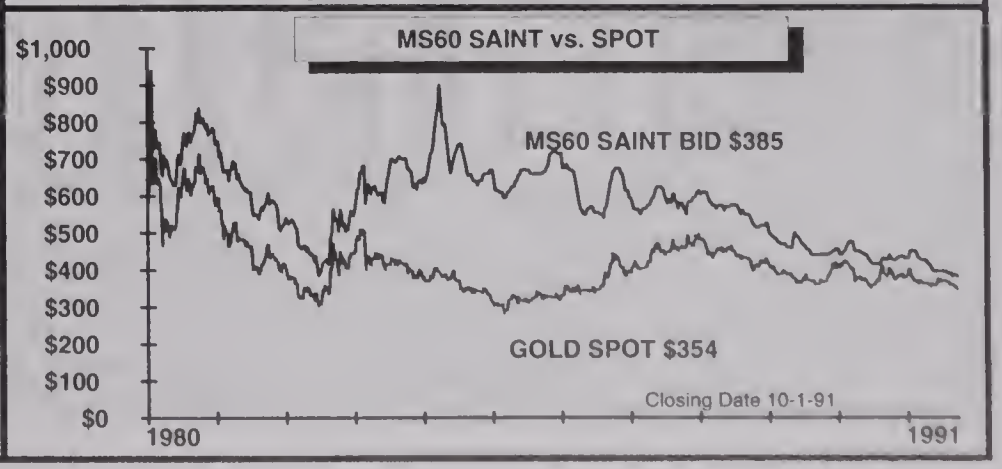
THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 – Unc. – May not have full mint lustre, may be dull, toned or spotted. May be the worst possible example, but shows no wear or damage. Will be bagmarked and/or weakly struck.



MS-63 – Choice BU – Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 – Distinct BU – Far and away nicer than MS-63, yet a near miss MS-65. Few Contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 – Gem BU – Sharp, full strike, full lustre. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade. **Must** have eye-appeal.

MS-67 – Superb. Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Deep Mirror Prooflike – Will exhibit the same characteristics as the corresponding Mint State Morgan, but with the additional feature of deep mirror surfaces on both sides.

MARKET ACTIVE AT TODAY'S TRADING LEVELS
COLLECTORS TAKING ADVANTAGE OF BARGAINS

The Market in Depth

Is this market really listless or have we just reached a point where we have to accept the fact that new trading levels have been achieved? Granted, business is slower than normal (and much slower than we would like), but we see a lot of dealers with want lists trying to buy coins for their customers. This shows that there are still many people trying to do business out there who believe in this coin market.

Not everyone can afford the high ticket coins. But, there are still expensive coins being marketed whether they are sold to another dealer or to advanced collectors. What we all must keep in mind is that the market today is much different than it was a few years ago. We are reminded of this everyday as we see one-time high priced coins selling at today's market; some for as little as 33% of previous highs. Some, even less than that. Nevertheless, there are those who believe that now is the time to begin taking a position in this market--before it takes off without them.

There is also more to the coin hobby than just MS65. There are literally thousands of dealers who are buying and selling Proof Sets, Mint Sets, BU Rolls, Modern Commems, and circulated Type coins. **Uncirculated** Commems, Dollars, Gold, and Type are also on want lists, with no real concern for the numeric grade (MS60, 61, etc.), as long as the coins are priced fairly.

Just look around any coin show or auction; business is taking place--at new levels. Maybe high ticket coins are not moving as easily as some dealers would hope, but there is strong interest in collector coins under $1,000. This point should be made more apparent at the Long Beach Coin Expo, which is taking place at this very moment (it runs Oct. 10 thru 13). The public will arrive; they will spend their available cash with those dealers who satisfy their needs the best (price and service). And they will leave happy because their money is buying **more** coin today than it would have two years ago.

This Week's Market

CENTS THRU HALVES: BU rolls are generally constant this week with a few issues moving to higher ground. Most offers to buy are at today's Bid levels. The few exceptions can be found in the Mercury Dime and Washington Quarter series. Here, offers to sell the lowered issues often go unanswered.

DOLLARS: The MS63 thru 65 columns in the Dollar charts reveal a continuing market of activity. It appears very healthy throughout with a strong tendency of increases to decreases. One small drawback this week, is the fact that common MS65 Morgans have fallen to $95 Bid. We will have to see how many dealers are willing to sell at these levels at Long Beach.

PROOF SETS AND MINT SETS: Proof Sets (1969 to date) are extensively lower this week. Larger than usual numbers of sellers are appearing at a steady rate. Even the Mint Sets are showing a propensity to lower levels.

COMMEMORATIVES: Gold Commems are starting to show some life. We are finding some consistent Bidding activity at current levels (some even higher) and very little discounting is taking place. **Plus** signs are a definite panacea to dealer attitudes. Silver Commems also exhibit the same kind of activity with the only exceptions being a few discounted sells to go along with plenty of increases.

TYPE: Stability is the key word in the Type market this week. Dealers are offering to pay current Bid levels for a majority of the issues listed; in several cases, Bids are even climbing higher. The 63 through 65 grades appear to be the most actively sought after issues at this time.

GOLD: Compared to last week, Mint State Gold is modestly stable. Granted, there are several minus signs, but most of the issues that declined fell very slightly. Many of the unchanged issues are wanted at Bid or very close to it.

EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$375/$381, 1987 1oz-$376/$383, 1/2oz-$180/$191, 1988 1oz-$380/$420, 1/2oz-$180/$203, 1989 1oz-$390/$430, 1/2oz-$220/$250, 1990 1oz-$485/$520, 1/2oz-$265/$300. Proof Silver Eagles are trading at: 1986-$14/$16, 1987-$14/$15, 1988-$69/$79, 1989-$14/$15, 1990-$22/$24. BU 1986 Silver Eagles wholesale at $11/$12.50.

The weekly **COIN DEALER newsletter** (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins **sight seen** The coins may be certified or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally: they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight-unseen** market, which already include consideration of certification costs Bids for a **sight seen** "raw" coin may be higher or lower than for a **sight-unseen** certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder, but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions, you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, NGC, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. For listed Bid prices of coins certified by ANACS, NCI, PCGS, and NGC, please refer to *the Certified Coin Dealer newsletter*

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and gem rolls bring more than listed prices. In the Jefferson series, some of the rolls in the late 50's tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "pot together" bring lower prices. Gem full strike Franklin/Kennedy rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUPPLEMENT. Mercury & Walker singles are on Page 10.

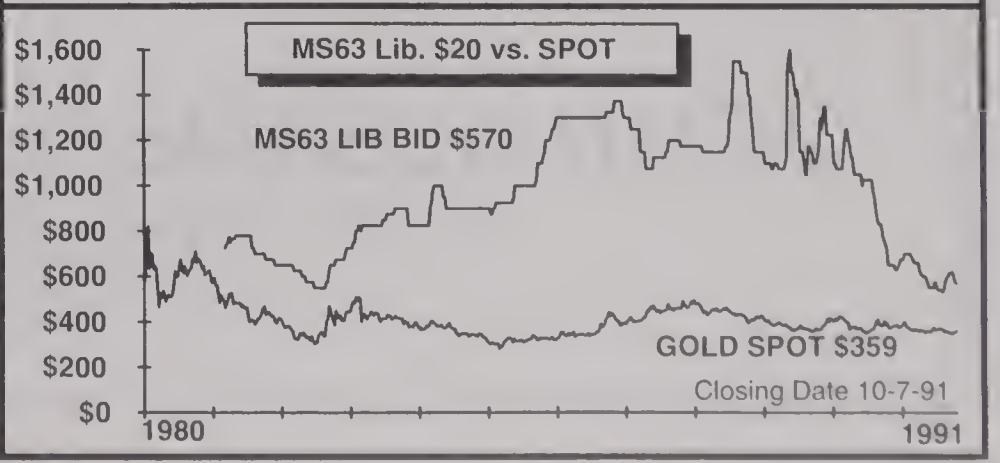
THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

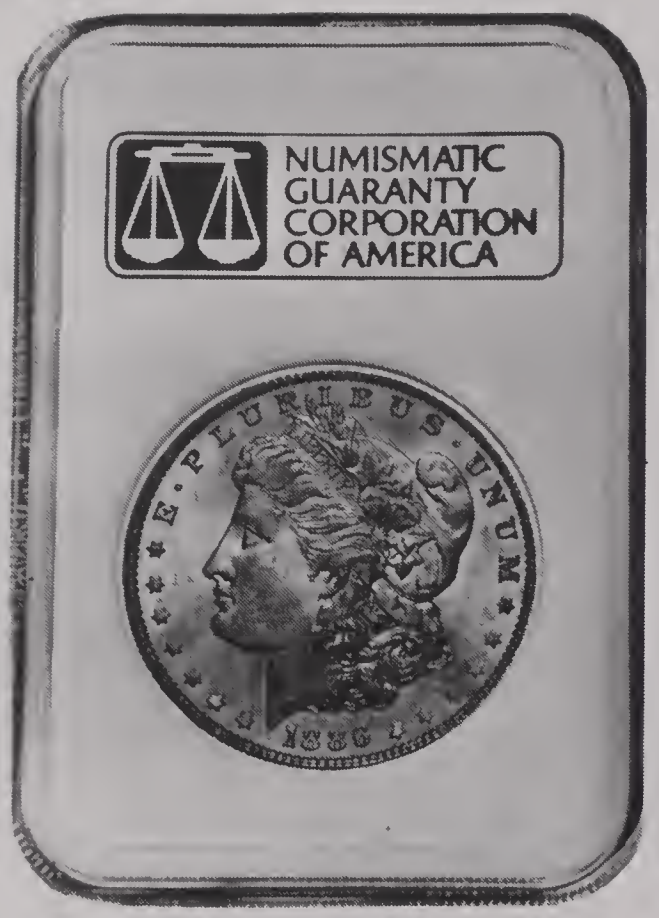
MS-60 – Unc. – May not have full mint lustre, may be dull, toned or spotted. May be the worst possible example, but shows no wear or damage. Will be bagmarked and/or weakly struck.



MS-63 – Choice BU – Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 – Distinct BU – Far and away nicer than MS-63, yet a near miss MS-65. Few Contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 – Gem BU – Sharp, full strike, full lustre. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade. **Must** have eye-appeal.



MS-67 – Superb. Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Deep Mirror Prooflike – Will exhibit the same characteristics as the corresponding Mint State Morgan, but with the additional feature of deep mirror surfaces on both sides.

New PCI CAPSULE® - *. . . Destined To Make Coin Slabbing Economical for Everyone*

The Secret Revealed: As recently reported in the news, Hallmark Grading Services, Inc., has been disolved and will no longer grade coins. On April 16, 1991, Photo-Certified Coin Institute (PCI) acquired the entire assets of Hallmark Grading Service (except the name). In the deal we got virtually everything but the kitchen sink. . . including the technology, hardware, software computer programs and the molds used to produce their familiar coin slab now seen in the marketplace.

On June 1, 1991, the newly improved PCI CAPSULE® name replaced the old Hallmark logo. PCI will continue with the same format, bar coding and coin attribution (e.g. varieties, mintages, PQ status, etc.) that Hallmark developed for collectors, including their intricate anti-counterfeiting measures.

The best part is that the new CAPSULE® slab will cost substantially less, both in manufacturing and processing time, to evaluate coins. And, because of these technological advances, PCI will now be charging only $6 per coin to grade, authenticate and encapsulate all U.S. coins in the new CAPSULE® slab.

A few years ago, one of the owners of another slab grading service stated that "someday" he could forsee slab fees as low as $5 or $6. Today, that projection has become reality with the shortest turn around guarantee in history (6 working days after we receive your coins).

At PCI, we have always relied upon 3 basic business practices that you can count on:

(1) **to process** your coins at the lowest rates & shortest turnaround time. . . in history,

(2) **to remain open** to the general public without favoritism to any dealer or individual,

and (3) **to provide the most** technologically consistent and accurate grading service possible.

6 COIN MINIMUM, NO MAXIMUMS, NO HIDDEN COSTS . . . to take advantage of this new service please fill out the actual submittal form shown below. ***Note:*** If your coin(s) are cleaned, whizzed, discolored or otherwise not eligible for slabbing, PCI will still grade, authenticate & issue a formal grading report for each coin.

We also accept foreign coins, errors and colonials that may be slabbed in our $10 photoslab. You may mix or match the $6.00 and $10.00 services.

Look for this symbol to save you money!

LONG BEACH HIGHLIGHTS MARKET STRENGTHS
MOVEMENT OF COINS STILL THE KEY

The Market in Depth

The Long Beach Coin Show was definitely different than those of the last decade. At times, it almost seemed like the market of the mid-to-late 1970s. Many coin prices are similar, many dealers were in attendance, the public was spending cash for specific *want list* coins, and under-$1,000 coins showed the strongest trading. Dealers are reacting to the one main difference in today's market – the higher costs of doing business. Operations are being streamlined and fewer staff members are attending shows (meaning smaller hotel, airline, and food bills). The dealers who were quickest to adjust to the 'new' market will do the best when times get toughest. Collectors adjust too, taking advantage of the market to buy coins at *very* reasonable levels compared to recent highs. Dealers feel that if this is not *the* time to buy, then we are very close to it.

We are gratified by the warm response from many dealers to our new ***Greysheet*** graphing feature on Page 3. We hoped the graphs would be effective selling tools, and are now hearing reports of their effectiveness in helping make sales. Our first chart, the MS60 Saint $20 vs. Spot Gold since 1980 was instructive to us. We all know that spread varies over time (and is especially narrow right now), but the graph makes the point so simply. When a buyer enters the shop looking for a shiny new Eagle to fill a bezel, the chart makes a great supplement to a 'pitch' on buying the '*real thing*' – the Saint gives you history, beauty, and a premium above spot rarely this low.

Last week's MS63 Liberty $20 graph told a similar story of reasonable numismatic *premiums*. The contrarian will look at the chart and conclude that it is time to invest; the careful buyer will conclude that he can buy the maximum "nice coin" possible. *How much closer could the spreads get?* This week we charted the AU Saint Gaudens $20; the current $20 premium over spot is almost non-existent. We all know that the $20 contains a bit less than 1-ounce of gold, so someone interested *only* in bullion content might prefer a VF for a few dollars less. But for $30 more, it's possible to own a nice looking AU coin. And if destined for a bezel or a 'high-circ' collection, the AU Saint will often be more attractive than the MS60. All this going for it, and the lowest spread in more than a decade (especially when considering inflated dollars!) As we survey different coins in different series, the graphs will obviously tell different stories, but we suspect they will all support *the right time to buy*.

This Week's Market

CENTS THRU HALVES: Early BU rolls were steady this week with just a few declines (prior to 1950), mostly in the Washington series. However, after 1950, nearly all the changes were to higher levels. The Franklin series responded with the most activity as the majority of issues climbed.

DOLLARS: This week was typical for Dollars as pluses and minuses dotted the columns (MS60 to MS65). Bargain-hunting may be fashionable in today's marketplace, but for those dealers with strong want lists, prices already seem reasonable. Common Morgans in MS64 & 65 are holding firm at $34 & $94, respectively.

PROOF SETS AND MINT SETS: Late Proof Sets continue to be discounted with few if any buyers of these particular sets at current levels. Mint Sets are also being discounted, thus creating lower levels in this area, as well.

COMMEMORATIVES: Both Gold and Silver Commems remain active at today's levels. In monitoring sales at the Long Beach Show, it is obvious that many dealers feel this market is modestly steady; they may not be ready to jump prices, but they are satisfied that Bids may not go much lower. To back up this thinking, they point out the thin spreads between grades on many issues. Also, several issues do not have much of a premium on MS63s over the XF/AU specimens.

TYPE: Type coins were very active at Long Beach. However, in some cases, the selling prices were less than the previous Bids, resulting in "new" lower Bids. Yet, collectors were seeking various issues to help fill-in gaps in their collections. It was obvious that certain high-priced coins had to be discounted in order to entice a new buyer.

GOLD: Despite a tendency to lower levels again this week, Mint State Gold appears to be within a narrow trading range. The declines were very meager and there were a few plus signs to go along with the numerous issues which remained unchanged. Circulated $20s were off ever so slightly due to lower bullion levels.

EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$376/$382, 1987 1oz-$377/$383, 1/2oz-$180/$194, 1988 1oz-$380/$405, 1/2oz-$180/$200, 1989 1oz-$390/$425, 1/2oz-$220/$250, 1990 1oz-$485/$510, 1/2oz-$265/$295. Proof Silver Eagles are trading at: 1986-$15/$16, 1987-$15/$15.50, 1988-$69/$77, 1989-$14.50/$15.50, 1990-$22.50/$24. BU 1986 Silver Eagles wholesale at $11.10/$12.50.

The weekly **COIN DEALER newsletter** (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins **sight-seen**. The coins may be certified or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally, they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight-unseen** market, which already include consideration of certification costs. Bids for a **sight seen** "raw" coin may be higher or lower than for a **sight-unseen** certified coin due to current market conditions. The **CDN** may not change Bid due to the bidding adjustments of the high bidder but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions, you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and gem rolls often bring more. In the Jefferson series, some of the rolls in the late 50's tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury [illegible] bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the 5-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUPPLEMENT. Mercury & Walker singles are on Page 15.

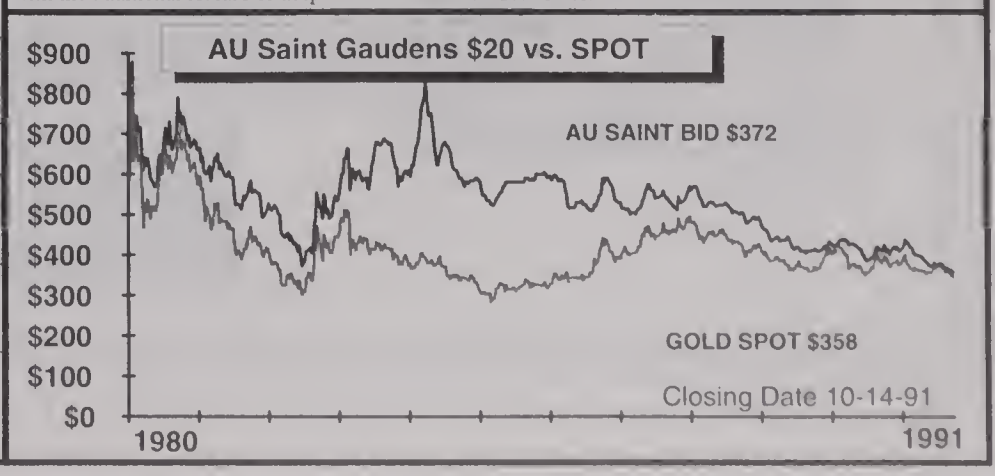
THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 – Unc. – May not have full mint lustre, may be dull, toned or spotted. May be the worst possible example, but shows no wear or damage. Will be bagmarked and/or weakly struck.



MS-63 – Choice BU – Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 – Distinct BU – Far and away nicer than MS-63, yet a near miss MS-65. Few Contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 – Gem BU – Sharp, full strike, full lustre. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade. **Must** have eye-appeal.

MS-67 – Superb. Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Deep Mirror Prooflike – Will exhibit the same characteristics as the corresponding Mint State Morgan, but with the additional feature of deep mirror surfaces on both sides.

DO YOU WANT TO INCREASE THE VALUE OF YOUR U.S. COINS?

HERE'S HOW TO DO IT:

THE NEW IMPROVED $6 CERTIFIED CAPSULE®

Provides You The Ultimate Tool In Defining The Maximum Value Of Your Coins.

WHAT CAN YOU EXPECT FOR $6?

1. **Accurate, consistent grading**. . . that allows you to look up the value of your coins. Don't sell too cheap or pay too much! Also, if you check around you'll find the new PCI Capsule® is the lowest priced Professional Grading Service in America.
2. **Attribution**. . . PCI recognizes that all coins are not "generic" and provides the sophisticated coin collector and dealer not only with 3rd party unbiased grading, but information you don't receive with other services. For example, we provide Breen, Newcomb, and Bolender numbers. We show die varieties, errors, mintage features and pedigrees. We list on the slab insert specialties like FBL (Full Bell Lines), FB (Full Bands), PL, DMPL, Red, 75% and 90%, FH (Full Head) and a host of others. But best of all. . . the PCI slab has an exclusive on 'PQ' designation. All of this printed on a high security certificate insert designed against counterfeiting or coin switching.
3. **Long term protection against the elements**. . . is provided to you with clear, attractive, museum-quality encasement (slab) that is ultrasonically sealed. (This fact alone could justify the $6.00 fee).
4. **You are the boss at PCI**. . . because we're the ***only*** ones who accept coins from everybody! No trade restrictions here and that's because we trust you to be private and confidential!

If this offer looks exciting to you, then give PCI a try. You may submit raw coins, coins already slabbed by other services, or coins you think could be "Premium Quality".

Our 29th year...

Single copy price $3.50 Vol. XXIX No. 43 October 25, 1991 *. . .a Friday morning report on the Coin Market*

SLUGGISH MARKET CONTINUES
SILVER COMMEMORATIVES LEADING ACTIVITY

The Market in Depth

The coin market continues its recent lethargy, with prices basically stable but activity remaining somewhat sluggish. The market continues to offer a modicum of pricing changes, with plus signs indicating that demand is still very much alive, and minus signs indicating that dealers are still willing to offer a deal to keep the inventory moving and cash flow healthy. Silver Commemoratives are quite active at these levels, and demand is pushing many Bids higher.

The auction market continues to enjoy strong Bidding support, as increasing numbers of collectors have turned to this method to purchase coins. Stack's recently held October 1991 Sale, offering both U.S. currency and coins, realized more than $2.9 million, and set several records in the process. Significantly, the highlighted and pedigreed Alto II Collection, assembled during the first half of the century, was offered without encapsulation. Quality coins, naturally beautiful in their original states, are still capable of achieving high prices. Among the prominent lots: (see inset)

1793 Half Cent, MS60	$20,900
1795 Half Dime, Ch BU PL	$14,025
1857 Seated Dime, Ch Br. Pr.	$13,750
1804 Bust Quarter, EF	$6,600
1807 Bust Half, Hd R., Ch BU	$14,300
1836 Gobrecht $1, below Base, Br Pr.	$20,350

Dealers are starting to think about the holiday buying season, and how to position their products to make them more attractive as gifts. Over the years, Proof sets and modern Mint products have made extremely attractive, moderately priced gifts. With the lower prices on many series now, Mint State Morgan Dollars and Walking Liberty Halves, to name just two attractive coins, have become a very real gift alternative.

Dealers have been watching the rising prices on Columbia Exposition Commemorative Halves for about a year now, as marketing plans revolving around these coins are falling into place. As marketers have procured the supply of coins that they think they need, some of the steam has been going out of this rally; really substantial public demand for the products could liven things up again next year. We can only hope that members of the public, buying these wonderful pieces of history as keepsakes, have a good experience with their first exposure to numismatics, and that some of them will be tempted to discover more about coin collecting. Mass merchandising and rare coins haven't always gone well together, but there is no intrinsic reason that the former cannot help encourage the latter.

This Week's Market

CENTS THRU HALVES: The BU roll market is generally steady this week, with the majority of interest centered around the Franklin series. Numerous plus signs can be found on issues from 1955 through 1963.

DOLLARS: The Dollar charts indicate the customary number of changes likened to the past several weeks. There seems to be a respectable balance of ups and downs, thus signifying a moderately sound level of activity. Common Morgan issues in MS64 & 65 are attempting to hold steady at $33 and $94, respectively.

PROOF SETS AND MINT SETS: After last week's downturn in Proof Sets, there are just a few additional minuses this week. We have found noticeable support for most issues at current levels. Mint Sets are still encountering some discounts as dealers try to thin down their inventories.

COMMEMORATIVES: Looking at the Silver Commem chart on Page 2, you will immediately notice that the majority of plus signs can be found in the MS64 column. In comparing the MS63 to MS64, you should realize the minute difference in Bid prices, whereas, the spreads increase dramatically from MS64 to 65. Judging from this data, dealers feel that 64s are capable of moving in the direction of 65 levels.

TYPE: Type coins are mostly steady this week with buyers attempting to purchase coins at current levels. The issues which have changed have moved only slightly in response to either higher buy messages or discounted sell messages.

GOLD: Mint State U.S. Gold continues to show signs of weakening. In some cases, the lower "sells" are causing sizable reductions in the Bid levels. Several dealers have pointed out that they are not in the market for high-priced coins, or even common issues for that matter, unless they have customers for them.

EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$381/$387, 1987 1oz-$382/$388, 1/2oz-$180/$192, 1988 1oz-$390/$410, 1/2oz-$185/$200, 1989 1oz-$400/$425, 1/2oz-$220/$250, 1990 1oz-$485/$510, 1/2oz-$280/$295. Proof Silver Eagles are trading at: 1986-$15/$16, 1987-$15/$15.50, 1988-$70/$78, 1989-$15/$15.50, 1990-$22.50/$25, 1991-$25/$27.50. BU 1986 Silver Eagles wholesale at $11/$12.25.

The weekly **COIN DEALER newsletter** (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins **sight-seen**. The coins may be certified or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally, they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight-unseen** market, which already include consideration of certification costs. Bids for a **sight seen** "raw" coin may be higher or lower than for a **sight-unseen** certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer to Dealer transactions, you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, NGC, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. For listed Bid prices of coins certified by ANACS, NCI, PCGS, and NGC, please refer to *the Certified Coin Dealer newsletter*.

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and gem rolls often bring more. In the Jefferson series, some of the rolls in the late 50's tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, gem full bands" rolls are worth more than listed prices– particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUPPLEMENT· Mercury & Walker singles are on Page 10

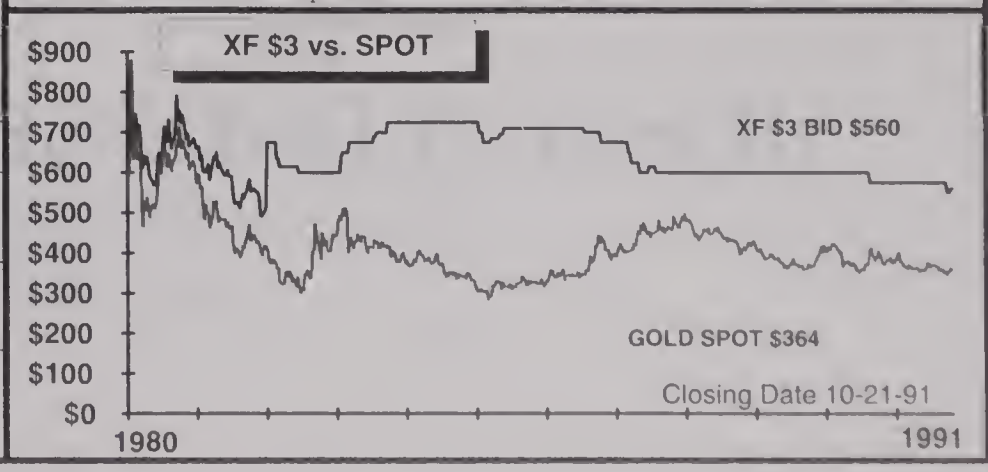
THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

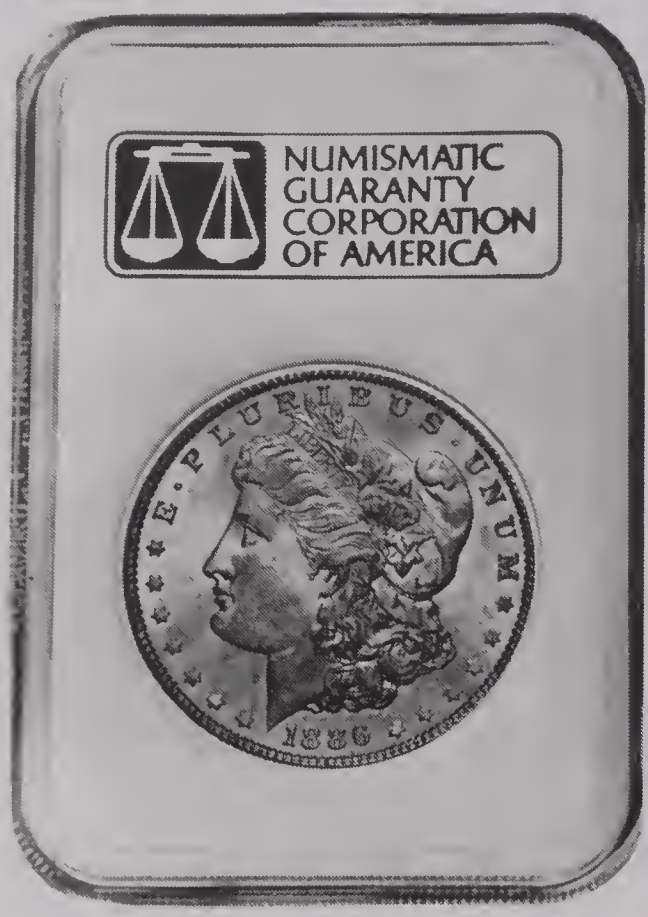
MS-60 – Unc. – May not have full mint lustre, may be dull, toned or spotted. May be the worst possible example, but shows no wear or damage. Will be bagmarked and/or weakly struck.



MS-63 – Choice BU – Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 – Distinct BU – Far and away nicer than MS-63, yet a near miss MS-65. Few Contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 – Gem BU – Sharp, full strike, full lustre. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade. **Must** have eye-appeal.



MS-67 – Superb. Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Deep Mirror Prooflike – Will exhibit the same characteristics as the corresponding Mint State Morgan but with the additional feature of deep mirror surfaces on both sides.

MARKET LETHARGY CONTINUES
GENERIC MORGANS SLUMP

The Market in Depth

The overall sense of lethargy permeating the coin market shows no signs of letting up, and the surest sign of dealers' attitudes was seen in the sight-unseen trading of MS65 certified Morgan Dollars below $90. Back when coins were a "great investment", can you remember customers lining up for these beauties at $700? Not to insinuate any difference in grading standards, they sure look prettier below $100 - and we keep wondering when the collectors and investors are going to realize it. The contrarians may be waiting for prices to slide a bit further, but at these levels "averaging down" wouldn't be a bad strategy to combine with "picking and choosing".

This week's page 3 chart contrasts the performance of MS65 Saint Gaudens $20s and Liberty T.3 $20s since 1980. Remember 1980, when men were men, coins were coins, and $20s were gold. Sure, there were price differences between spot and MS 65 coins: Spot was $576, an MS65 Saint Bid at $800, and MS65 Lib Bid at $875. Showing spreads of that magnitude on a graph becomes difficult when the scaling has to include the $13,000 level which MS65 Libs reached at their peak. Such scaling does reveal some interesting trends. For example, over the last ten years, the volatility in gold spot becomes almost non-existent; it certainly pales in comparison with coin prices. And despite the current slump in the numismatic marketplace, over the last 11 years, the *holder* of MS65 Double Eagles that slabbed MS65 would still be well ahead of the bullion gains.

Perhaps most interesting is the growing awareness of the true rarity of MS65 Lib $20s that began to develop after 1985. After a steady premium during the first half of the decade, by the beginning of 1986 MS65 Libs began to grow "rarer". A suitable topic for numismatic discussion would be whether "true" MS65s were always that much rarer (a fact that was not recognized at the time), or whether the grading standards for the certification of MS65 Libs *made* them that much rarer (a fact that was *created* at the time). Regardless of your viewpoint, the owner of true gem Lib $20s could have sold out at the top for enormous profits. Which buyers will be lucky enough or bright enough to profit during future cycles?

Editor's Note: Special congratulations are in order for Superior Galleries' newest auction policy: Announcing when the owners of coins are bidding from the floor on their own material. This crucial information will enable serious floor bidders to make better informed choices.

This Week's Market

CENTS THRU HALVES: While the biggest percentage of issues in the BU roll market are stable at today's levels, a rather large amount of sellers came out of the woodwork this past week. The result of all the discounts can be seen on Page 3. Many declines can be found in the Lincoln Cent and Jefferson Nickel columns. The Wartime Nickels were hit especially hard; early Franklins are also lower.

DOLLARS: As mentioned in the Market in Depth, Morgan Dollars are slipping in MS65. First, Bidders lowered their buys slightly, then the sellers decided to follow suit. Now Bid is down to $88 and potential sellers seem to be more aggressive than potential buyers. Many dealers are reporting that they are weary of common 65 Dollars at this time. This, even though they are at their lowest level in a decade.

PROOF SETS AND MINT SETS: Proof Sets show a multitude of declines this week. Included in this fall are the early (1936-1942) sets. There seems to be decreasing support for many of these sets due to slower-than-usual business on a retail level. Most of the changes in the Mint Set column are to the downside.

COMMEMORATIVES: Silver Commems seem to be holding up their end of the marketplace. Included in this support are the Gold issues which show a large number of increases this week. However, if market psychology does not improve quickly, watch for this area to follow other areas rather than lead the market.

TYPE: A marked steadiness is readily apparent from a perusal of the Type charts. The majority of issues are unchanged and the ones which have moved are mostly higher. This includes the Proof issues as well as the Mint State ones.

GOLD: The U.S. Gold market (in Mint State) lacks real support at this time. In fact, there are many more sellers than buyers at current levels. Thus, the number of declines is way above normal; further, many of these lowered issues have dropped substantially. Where will the support come from?

EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$377/$383, 1987 1oz-$378/$390, 1/2oz-$183/$195, 1988 1oz-$385/$410, 1/2oz-$185/$198, 1989 1oz-$390/$417, 1/2oz-$220/$255, 1990 1oz-$475/$502, 1/2oz-$270/$285. Proof Silver Eagles are trading at: 1986-$14.50/$15.50, 1987-$14/$15, 1988-$72/$76, 1989-$15/$15.50, 1990-$22/$25, 1991-$25/$28. BU 1986 Silver Eagles wholesale at $10.75/$11.75.

The weekly **COIN DEALER newsletter** (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins **sight-seen**. The coins may be certified or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally: they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight-unseen** market, which already include consideration of certification costs. Bids for a **sight seen** "raw" coin may be higher or lower than for a **sight-unseen** certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

COMMEMORATIVES

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, NGC, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. For listed Bid prices of coins certified by ANACS, NCI, PCGS, and NGC, please refer to *the Certified Coin Dealer newsletter*.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the rolls in the late 50's tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series "gem full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the 5-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUPPLEMENT. Mercury & Walker singles are on Page 10.

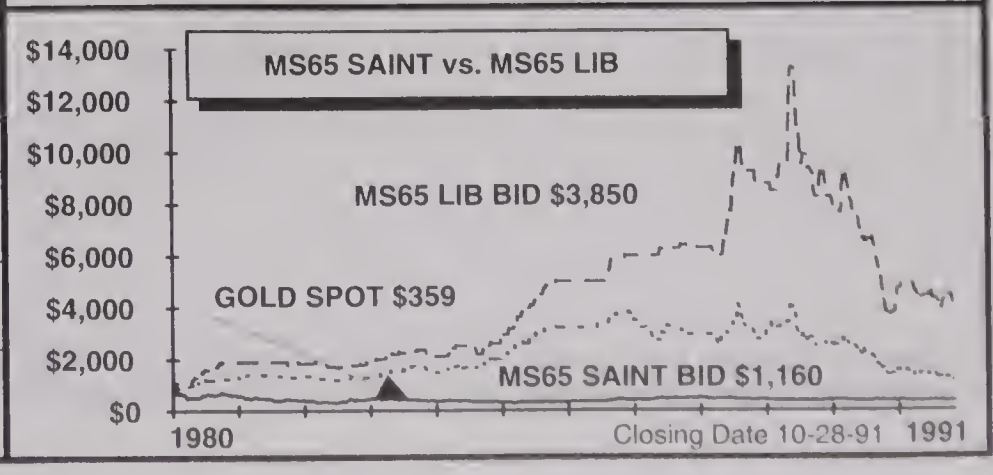
THE GREYSHEET

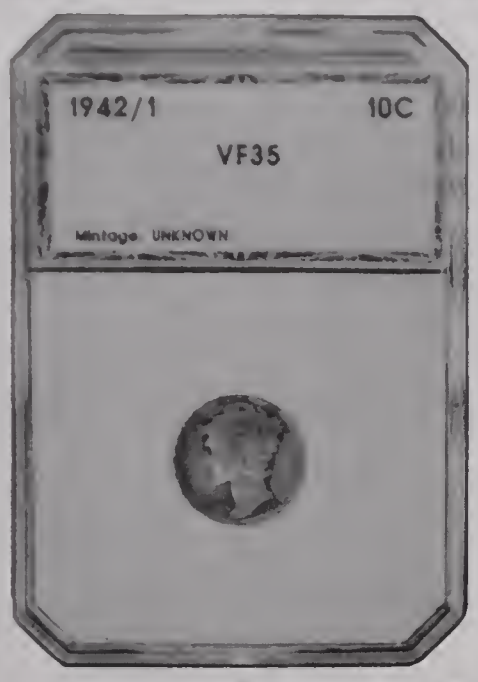
Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 – Unc. – May not have full mint lustre, may be dull, toned or spotted. May be the worst possible example, but shows no wear or damage. Will be bagmarked and/or weakly struck.



MS-63 – Choice BU – Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 – Distinct BU – Far and away nicer than MS-63, yet a near miss MS-65. Few Contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.



MS-65 – Gem BU – Sharp, full strike, full lustre. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade. **Must** have eye-appeal.

MS-67 – Superb. Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Deep Mirror Prooflike – Will exhibit the same characteristics as the corresponding Mint State Morgan, but with the additional feature of deep mirror surfaces on both sides.

DO YOU WANT TO INCREASE THE VALUE OF YOUR U.S. COINS?

HERE'S HOW TO DO IT:

THE NEW IMPROVED $6 CERTIFIED CAPSULE®

Provides You The Ultimate Tool In Defining The Maximum Value Of Your Coins.

WHAT CAN YOU EXPECT FOR $6?

1. **Accurate, consistent grading** . . . that allows you to look up the value of your coins. Don't sell too cheap or pay too much! Also, if you check around you'll find the new PCI Capsule® is the lowest priced Professional Grading Service in America.
2. **Attribution** . . . PCI recognizes that all coins are not "generic" and provides the sophisticated coin collector and dealer not only with 3rd party unbiased grading, but information you don't receive with other services. For example, we provide Breen, Newcomb, and Bolender numbers. We show die varieties, errors, mintage features and pedigrees. We list on the slab insert specialties like FBL (Full Bell Lines), FB (Full Bands), PL, DMPL, Red, 75% and 90%, FH (Full Head) and a host of others. But best of all . . . the PCI slab has an exclusive on 'PQ' designation. All of this printed on a high security certificate insert designed against counterfeiting or coin switching.
3. **Long term protection against the elements** . . . is provided to you with clear, attractive, museum-quality encasement (slab) that is ultrasonically sealed. (This fact alone could justify the $6.00 fee).
4. **You are the boss at PCI** . . . because we're the ***only*** ones who accept coins from everybody! No trade restrictions here and that's because we trust you to be private and confidential!

If this offer looks exciting to you, then give PCI a try. You may submit raw coins, coins already slabbed by other services, or coins you think could be "Premium Quality".

Our 29th year...

Single copy price $3.50 Vol. XXIX No. 45 November 8, 1991 *...a Friday morning report on the Coin Market*

MARKET MAY BE STAGGERING, BUT PROSPECTS ARE EXCELLENT
COMMON MORGANS TRADE AT LOWER LEVELS

The Market in Depth

While the market appears dismal to most onlookers, to many collectors the opportunities now seem endless. In the recent past (the last five to six years), when prices seemed abnormally high to the collector community, many coins were out of reach of the coin budget. Not so suddenly, collectors have renewed chances to procure those rarities which were out-of-reach. As bleak as it may be to the dealer or collector who have seen the value of their inventories falter dramatically the last few years, the likelihood of recuperating those losses in the future is good.

What will it take to regain the momentum that the economy has helped destroy? Simply, confidence in the proportional rarity of coins. It is obvious by the numbers of coins "circulating" in dealer stock boxes at coin shows that some coins are not-so-rare. They never were. Yet, dealers and collectors alike, misunderstood the initial low populations of these issues as listed in the early census reports. It was not the coins that were rare, it was the holders.

As more coins were certified, the numbers mounted. Supplies increased, coins were sold to customers; more coins were graded which could not be sold to the same customers, while no new customers were found. This reminds me of a clogged sink. As the water overflows, it just builds up until the drain is cleared. In this case, the drain hasn't cleared yet. And the only way to clear it is to sell those excess common coins. However, the excess supplies will not disappear until they are priced at a level which will entice customers who already own coins at higher levels (so they can average down), or to new customers who can envision price advances in the future.

Look at Morgan Dollars and Walking Liberty Halves! They were in the forefront of the price explosions of the eighties. Can you visualize Morgans at $700, $800? No, but when they were at these levels, could you see them falling to **under $100?** Many dealers felt that, yes, they could fall, maybe a lot. But their estimates were not nearly this dramatic. For the most part, the real pessimists thought that MS65 Morgans might fall to $250 each. Now, who knows where they will find support?

What is readily apparent is that Bid levels are at a mere fraction of previous levels. Not all issues and grades will attain past levels, but by doing comparisons of **rarity**, **availability**, and **past performance**, you can get a pretty good idea which issues will have the most likelihood of major price increases in the future.

This Week's Market

CENTS THRU HALVES: The BU roll market has a fair amount of changes this week as particular rolls are wanted at higher levels. The most active appear to be the Franklin Half series along with late-date Jefferson Nickels. Even where changes are not visible, Bidders are willing to pay current Bids for many specific dates.

DOLLARS: Common Morgan Dollars continue to seek new lower levels. The Bid levels for MS63, 64, & 65 issues are slowly drifting to levels that many dealers felt would never be seen again. MS65s have traded this past week at the $85 level, while the spread between MS63 and MS64 becomes very minuscule--$23 to $30, respectively.

PROOF SETS AND MINT SETS: Activity has slowed somewhat for Proof and Mint Sets. Very few changes can be found this week, although the ones monitored have fallen slightly. The next few weeks should see signs of activity in this market picking up for the holiday season.

COMMEMORATIVES: Silver Commems indicate a generous number of issues which remain unchanged and are active at today's levels. However, there are also a multitude of issues which have fallen due to the pressure of discounted sells this week. Still, even those which are lower seem to be trading at their new levels.

TYPE: The Type market (Mint State) remains moderately balanced again this week. There are enough increases and decreases in the charts to let dealers know that there are definitely buyers for some issues (at current levels) and a few bargains to be had if they have a customer for specific issues. Proof Type appears to be a little stronger as many strong buyers have advanced Bids.

GOLD: Mint State U.S. Gold appears to be struggling at previous Bid levels. There are vastly more sellers than buyers and the discounts seem to be getting larger. Many times in the recent past, Bids would fall as sellers discounted their coins, but only slightly, such as, from $925 down to $910 or $900. This past week, we have seen Bids drop from $915 down to $825, as sellers are just trying to move inventory as quickly as possible.

EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$372/$382, 1987 1oz-$374/$384, 1/2oz-$183/$193, 1988 1oz-$380/$405, 1/2oz-$185/$197, 1989 1oz-$385/$415, 1/2oz-$220/$260, 1990 1oz-$450/$500, 1/2oz-$265/$280, 1991 1oz-$500/$585, 1/2oz-$280/$315. Proof Silver Eagles are trading at: 1986-$14.50/$16, 1987-$14/$16, 1988-$68/$75, 1989-$14/$16, 1990-$23/$25, 1991-$25/$27.50. BU 1986 Silver Eagles wholesale at $10.50/$11.75.

A weekly comparison of ratios of certified coin Bid levels relative to CDN Bid levels (as 100%) sampled from 10 U.S. coin series (2 grades each). The weekly **COIN DEALER newsletter** (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins **sight-seen**. The coins may be certified or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally; they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight-unseen** market, which already include consideration of certification costs. Bids for a **sight seen** "raw" coin may be higher or lower than for a **sight-unseen** certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder, but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions; you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, NGC, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. For listed Bid prices of coins certified by ANACS, NCI, PCGS, and NGC, please refer to *the Certified Coin Dealer newsletter*.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the rolls in the late 50's tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUPPLEMENT: Mercury & Walker singles are on Page 10.

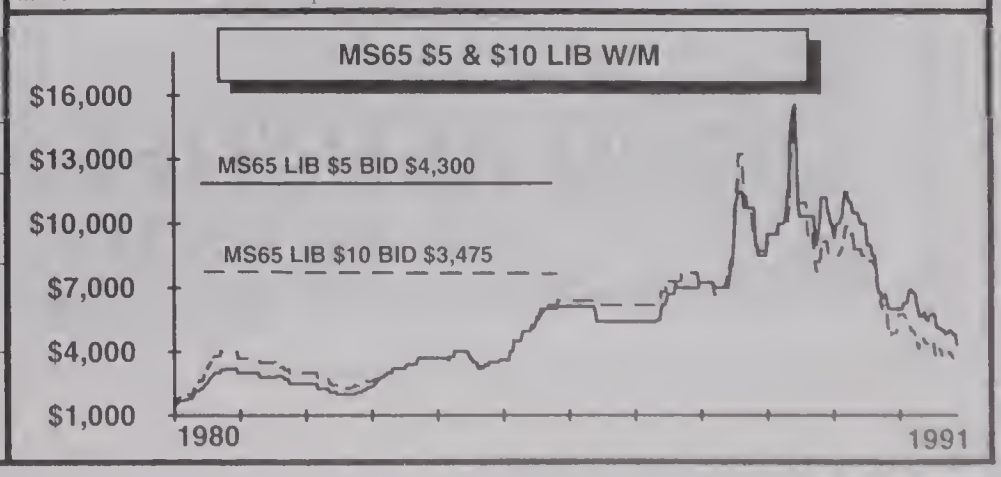
THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

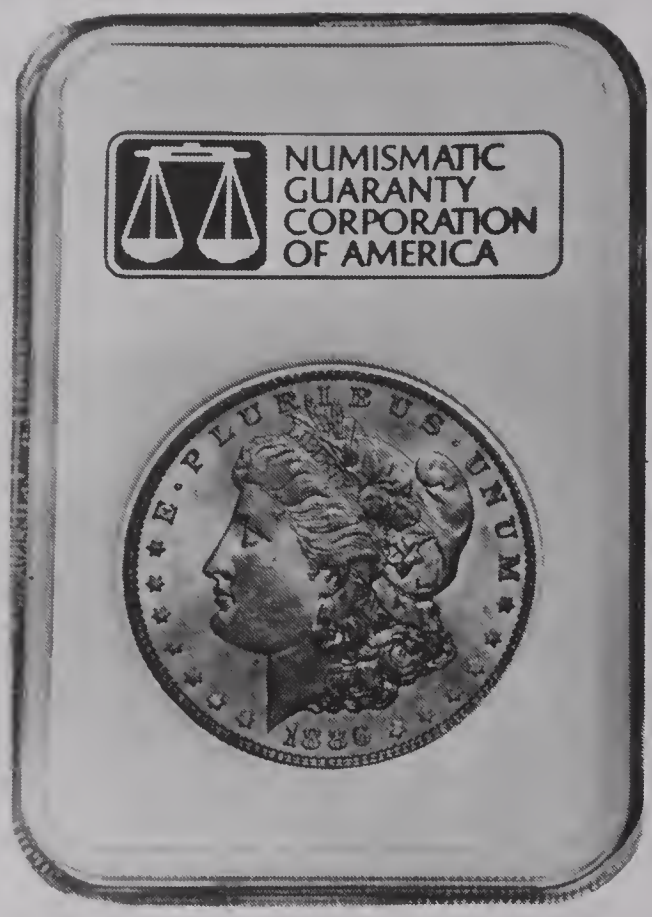
MS-60 – Unc. – May not have full mint lustre, may be dull, toned or spotted. May be the worst possible example, but shows no wear or damage. Will be bagmarked and/or weakly struck.



MS-63 – Choice BU – Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 – Distinct BU – Far and away nicer than MS-63, yet a near miss MS-65. Few Contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 – Gem BU – Sharp, full strike, full lustre. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade. **Must** have eye-appeal.



MS-67 – Superb. Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Deep Mirror Prooflike – Will exhibit the same characteristics as the corresponding Mint State Morgan but with the additional feature of deep mirror surfaces on both sides.

URGENT MEMO

TO: *All Dealers* FROM: *Ron Downing* RE: *IRS Cash Reporting Regulations*

Coin dealers are included in the IRS' "Operation Big Ticket" which targets industries the IRS believes are being used to launder drug money. The IRS is conducting detailed compliance checks of its CASH REPORTING regulations that require dealers to file IRS Form 8300 for transactions of $10,000 or more.

DO YOU KNOW

- what "structuring" is and that it is illegal?
- about "related transactions"?
- that if you do not report a transaction the IRS believes you ***should have known*** was suspicious, you could be in violation of these regulations?
- the definition of cash and which "monetary instruments" are considered to be cash?

PENALTIES

- Failure to file a Form 8300 is a criminal offense.
- Willful failure to file Form 8300 can result in fines starting at $25,000.
- Receiving cash known to have been illegally generated is punishable by 4½-5½ years in prison for the first offense.
- New laws regarding forfeiture of assets are even more sweeping than the drug possession forfeiture laws. Be aware that IRS "sting" operations are both legal and widespread.

INDUSTRY ACTION

CASH REPORTING regulations are confusing. ICTA (Industry Council for Tangible Assets)--the national trade association for collectibles dealers (coins, precious metals, sportscards, etc.)--is working to clarify and keep you up to speed on these changing IRS **CASH REPORTING** regulations. ICTA is the only way we've got to get some kind of relief. ICTA needs money to 1) provide information to keep you up to date; 2) pay lawyer(s) to communicate with IRS on terms they'll understand; 3) coordinate efforts with coalition industries to increase our "clout"; and 4) let IRS know our industry is unique--no other industry considers ***cash as merchandise***!

It's a sad fact of life that while we have the right to be heard, the cost of "hearing aids" in Washington is high. Without money, we can't pay for legal representation. Without funds, how can we even be part of any coalition? Without funds, we can't win. We'll barely be able to stay informed. Please help us with whatever donation you can make to the "ICTA **CASH REPORTING** FUND". Donors will continue to receive vital information on **CASH REPORTING** until the issue is resolved.

Our 29th year...

Single copy price $3.50 Vol. XXIX No. 46 November 15, 1991 *...a Friday morning report on the Coin Market*

ELECTION TO FORCE PRICES HIGHER?
MINT STATE GOLD DEVELOPING STRONGER BASE

The Market in Depth

A colleague recently brought to our attention the past correlation of Bull Markets in the coin business to presidential election years. With the help of our research staff, we found that he was correct. In the years of major elections 1964, '68, '72, '76, '80, '84, and '88, we found numerous bits of data in specific CDNs, which verified major market rises over an extended period of time. Thus, substantial profits could have been made by those who had positioned themselves just prior to these market advances.

Will 1992 be another opportunity for significant profits? Consider two main premises. One, that the government in power **must create** a resplendent image to the electing public during an election year and more importantly, just prior to actual voting. Two, prices for coins have plunged to recent record lows over the past several years, thus making it a very opportune time to purchase coins at presumed reasonable levels.

For purposes of this article, we used a newsletter from early January and compared it to one in early November of the suggested years. The issues selected were random but we did look for issues which met certain guidelines. A casual look at these comparisons pointed out the general validity of the four year cycle. A closer look at specific issues follows: (see inset)

	1900-S MS65 Morgan	1937 Proof Set	1938-P BU Dime Roll

Nov. 1, 1968	$ 23.00	$ 350.00	$ 120.00

Remember, the CDN staff does not recommend any particular coin issues nor do we buy or sell coins.

This Week's Market

CENTS THRU HALVES: Various issues within the BU roll market are beginning to revert to lower levels as dealers try to sell unwanted dates. However, the decreases are but a small percentage of the roll market and many other issues are steady at current Bids.

DOLLARS: Dollars continue to weaken as many dealers seem to be reducing their Dollar inventories while raising cash for other areas. Common MS65 Morgans have fallen to $80 Bid; some dealers are astounded that prices have drifted this low. Now, they are not quite sure where the support level may be.

PROOF SETS AND MINT SETS: The large number of decreases found in these two areas over the last couple of months has abated. However, there are still a few declines due to lowered sells by dealers with too much inventory.

COMMEMORATIVES: Although the Silver Commem market cannot quite determine in which direction it truly wants to head, it seems to be as solid as any series could possibly be considering the overall condition of the rare coin market. Even when minus signs are more plentiful than pluses, trades are active at the new levels. This week finds the market a little higher than last week with numerous increases in the charts.

TYPE: The Type charts depict relative stability this week as the majority of issues are active at current levels. There is a mixture of increases and decreases and as with the Commem market, even the discounted issues seem to be attracting buyers.

GOLD: While the U.S. Gold market continues to display several declines (Mint State), a more positive attitude has swung some issues to higher levels. Furthermore, some of the issues which had traded at lower levels in mid-week have seen reversals which caused them to remain unchanged from last week's CDN. We had several reports from dealers who felt that this area is building a very strong base.

EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$373/$378, 1987 1oz-$374/$382, 1/2oz-$182/$192, 1988 1oz-$380/$400, 1/2oz-$185/$197, 1989 1oz-$385/$415, 1/2oz-$220/$260, 1990 1oz-$450/$500, 1/2oz-$265/$278, 1991 1oz-$500/$585, 1/2oz-$280/$315. Proof Silver Eagles are trading at: 1986-$14.50/$16, 1987-$14/$16, 1988-$66/$75, 1989-$14/$16, 1990-$23/$25, 1991-$24/$26. BU 1986 Silver Eagles wholesale at $10.50/$11.75.

Use the Indicator to survey the entire market, not just a single issue. However, knowing these %'s will enable the reader to apply these numbers to specific CDN Bids in order to determine current market for certified coins.

A weekly comparison of ratios of certified coin Bid levels relative to CDN Bid levels (as 100%) sampled from 10 U.S. coin series (2 grades each). Chart reports the lowest and highest percentages found among the 20 comparisons, and the average of the 20 comparisons. All %'s relative to CDN as 100% base level. Data from latest issues of CDN, Monthly Supplement, and Certified Coin Dealer newsletter. For specific certified Bid levels, please refer to CCDn. Pre-1986 ANACS papers may bring considerably lower bids. Prices represent sight unseen Bids. The weekly **COIN DEALER newsletter** (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins **sight-seen**. The coins may be certified or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally; they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight-unseen** market, which already include consideration of certification costs. Bids for a **sight seen** "raw" coin may be higher or lower than for a **sight-unseen** certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to Dealer transactions; you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, NGC, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. For listed Bid prices of coins certified by ANACS, NCI, PCGS, and NGC, please refer to *the Certified Coin Dealer newsletter*.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and 'gem' rolls often bring more. In the Jefferson series, some of the rolls in the late 50's tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series "gem full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUPPLEMENT; Mercury & Walker singles are on Page 10.

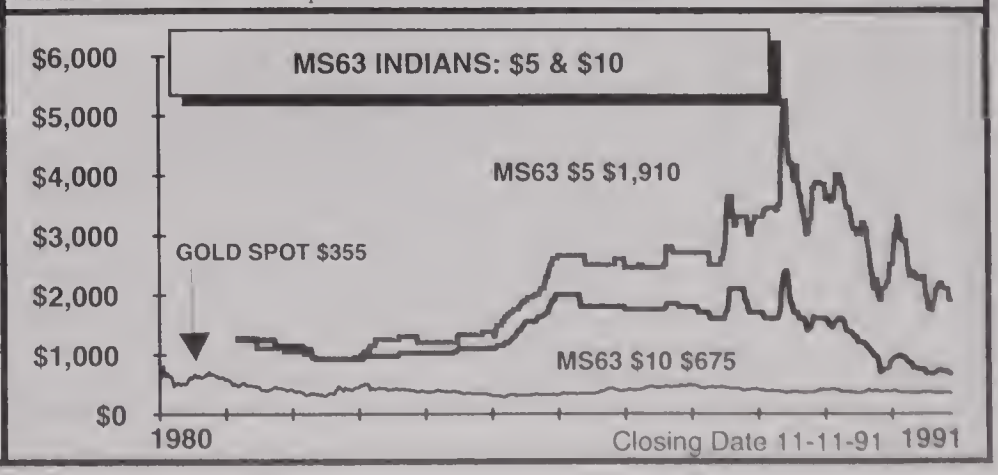
THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 – Unc. – May not have full mint lustre, may be dull, toned or spotted. May be the worst possible example, but shows no wear or damage. Will be bagmarked and/or weakly struck.



MS-63 – Choice BU – Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 – Distinct BU – Far and away nicer than MS-63, yet a near miss MS-65. Few Contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 – Gem BU – Sharp, full strike, full lustre. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade. **Must** have eye-appeal.

MS-67 – Superb. Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Deep Mirror Prooflike – Will exhibit the same characteristics as the corresponding Mint State Morgan, but with the additional feature of deep mirror surfaces on both sides.

DO YOU WANT TO INCREASE THE VALUE OF YOUR U.S. COINS?

HERE'S HOW TO DO IT:

THE NEW IMPROVED $6 CERTIFIED CAPSULE®

Provides You The Ultimate Tool In Defining The Maximum Value Of Your Coins.

WHAT CAN YOU EXPECT FOR $6?

1. **Accurate, consistent grading**. . . that allows you to look up the value of your coins. Don't sell too cheap or pay too much! Also, if you check around you'll find the new PCI Capsule® is the lowest priced Professional Grading Service in America.
2. **Attribution**. . . PCI recognizes that all coins are not "generic" and provides the sophisticated coin collector and dealer not only with 3rd party unbiased grading, but information you don't receive with other services. For example, we provide Breen, Newcomb, and Bolender numbers. We show die varieties, errors, mintage features and pedigrees. We list on the slab insert specialties like FBL (Full Bell Lines), FB (Full Bands), PL, DMPL, Red, 75% and 90%, FH (Full Head) and a host of others. But best of all. . . the PCI slab has an exclusive on 'PQ' designation. All of this printed on a high security certificate insert designed against counterfeiting or coin switching.
3. **Long term protection against the elements**. . . is provided to you with clear, attractive, museum-quality encasement (slab) that is ultrasonically sealed. (This fact alone could justify the $6.00 fee).
4. **You are the boss at PCI**. . . because we're the ***only*** ones who accept coins from everybody! No trade restrictions here and that's because we trust you to be private and confidential!

If this offer looks exciting to you, then give PCI a try. You may submit raw coins, coins already slabbed by other services, or coins you think could be "Premium Quality".

GENERIC MORGANS & MINT STATE GOLD FIRM
MARKET LOOKING FOR LEADERSHIP

The Market in Depth

Good news is coming out of the market, with this week's substantial increase in Bid for generic Morgan Dollars and Mint State Gold. The increase in MS65 Morgans from $80 to $90 is certainly impressive as a 10% jump in just one week; more significant, we think, is the demonstration of the market's resilience. Bid jumps around, but when it drops to an 'unreasonable' low level, new Bidders will jump in and raise levels. Obviously, there are lots of buyers who still think MS65 Morgans are worth a lot more than $80. After just one week, it is too early to speak of a stabilizing influence, but it is worth watching. With Mint State Gold in MS63 and above reacting similarly, it seems that buyers are determined to take advantage of the opportunities afforded by lower prices.

Underway is Bowers & Merena's Frontenac Sale, being held Nov. 20-22 in New York. Of special interest are the specialty collections being offered, including large reference collections of Colonials, Overton Halves, Liberty Seated Halves, and Hawaiian Patterns & Trials. Of special note to students of politics and collectors of Americana will be Harry Lessin's collection of Bryan Money. Among the lots from the regular U.S. coinage series, Bidders will notice the dominance of items appealing to the *collector*: 1793 Wreath Cent in MS63; a 1926-S Buffalo Nickel in MS65; an 1829 Bust Dime in MS63, prooflike; 1806 Bust Quarter in MS-62; 1839 No Drapery Liberty Seated Half Dollar; 1794 Bust Dollar, Bolender #1 in EF40; even a 1944 Steel Cent. For collectors with deeper pockets and a preference for Early or Rare Gold, there will be much of interest: 1858-D Gold Dollar in EF40; 1804 $2 1/2 in EF45; 1878 $3 in MS63; 1795 $5 in EF40; a pair of 1797 Eagles in EF; and an 1854-S $20 in MS62. One of the market indicators will be the 1907 High Relief $20 in MS65.

The select offering of One-Dollar gold coins will be an interesting test of the current market. These coins have long been a favorite coin among advanced collectors. Double Eagles are impressive because of their size and heft; $1 gold coins depend upon the intricacy of their design. One is tempted to compare them to the miniatures produced by other artists during the Eighteenth and Nineteen Centuries. Our page three chart traces the Bid history of the MS63 Type 1 and Type 3 Gold Dollars Since 1980. The influence of certification's population reports is readily visible, with the T. 1 suddenly becoming much "rarer" (and hence more "valuable"). It will remain for future generations of numismatists to determine the relative validity of the population reports. The premium paid for T.1s has been declining lately, and it remains to be seen whether the premium will again rise during the next bull market. In the meantime, either coin can be had for the 'best' price of the decade. Not bad for a neat little coin.

This Week's Market

CENTS THRU HALVES: The BU roll market continues to receive its share of activity. However, this week finds the majority of changes to the downside. In every series (Cents thru Halves) there are several minuses as sellers appear anxious to reduce their inventories. Only in the Washington Quarter series is there a discernible increase in Bid levels (mostly for late-date issues).

DOLLARS: As the price of MS65 Morgans (common issues) deteriorated the past few weeks, many dealers felt that they could not continue to drop as they did. When they hit $80 last week, it was only for a moment as several dealers jumped back in and started buying, quickly raising Bid to $85, then $88, until this week's higher $90. There is considerable support at this level and not many dealers offering to sell at this price. Most sellers are expecting to get at least $95 or they will sit on what they have in stock.

PROOF SETS AND MINT SETS: Proof Sets are again falling to lower Bid levels as dealers seem to be inventory-heavy. The only visible buyers are bargain-hunting at this time. Mint Sets are in the same "boat". There are more discounted sellers than Bid buyers.

COMMEMORATIVES: The Commem market remains fairly steady this week. And even though there are more minuses than pluses, the declining issues seem to be nearly as active as the other issues. This is one area where a lot of issues seem to trade on a regular basis, whether they are rising or falling. Buyers are always ready to jump in, especially if coins are being discounted from current levels.

TYPE: While you may notice a predominance of minus signs in the Type charts, the overall picture is one of stability. There are enough increases to virtually offset the declines and the majority of issues which remain unchanged are in demand at current levels.

GOLD: The U.S. Gold market has done a sharp turnaround. Apparently Bid levels fell too low because several dealers have begun buying again and taking advantage of the low prices. A whole slew of increases can be seen in the MS63, 64, & 65 columns as the onslaught which began about twelve days ago continues.

EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$377/$382, 1987 1oz-$376/$388, 1/2oz-$182/$192, 1988 1oz-$380/$399, 1/2oz-$185/$200, 1989 1oz-$375/$400, 1/2oz-$220/$260, 1990 1oz-$450/$500, 1/2oz-$260/$270, 1991 1oz-$500/$585, 1/2oz-$280/$315. Proof Silver Eagles are trading at: 1986-$14/$16.50, 1987-$14/$16, 1988-$65/$75, 1989-$14/$16, 1990-$22/$25, 1991-$23/$25. BU 1986 Silver Eagles wholesale at $10.50/$11.75.

A weekly comparison of ratios of certified coin Bid levels relative to CDN Bid levels (as 100%) sampled from 10 U.S. coin series (2 grades each). Chart reports the lowest and highest percentages found among the 20 comparisons, and the average of the 20 comparisons. All %'s relative to CDN as 100% base level. The weekly **COIN DEALER newsletter** (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins **sight-seen**. The coins may be certified or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally; they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight-unseen** market, which already include consideration of certification costs. Bids for a **sight seen** "raw" coin may be higher or lower than for a **sight-unseen** certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder, but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions, you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the rolls in the late 50's tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUPPLEMENT. Mercury & Walker singles are on Page 10.

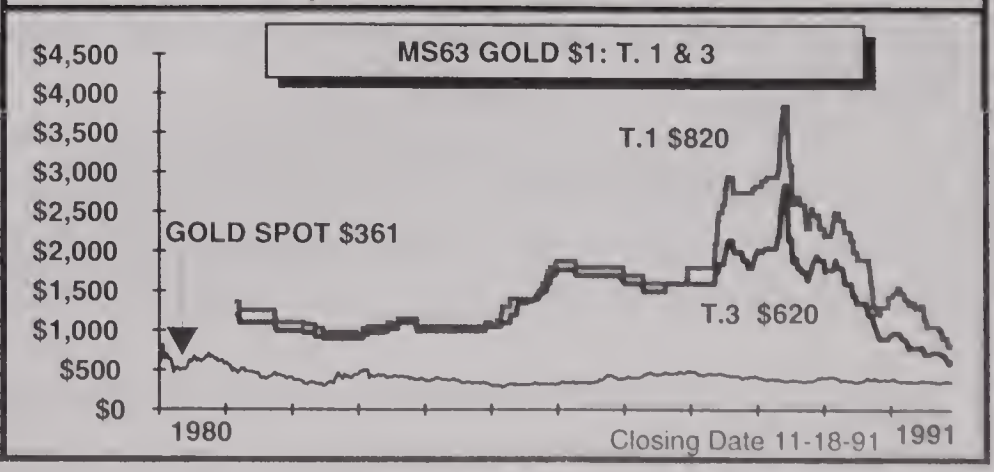
THE GREYSHEET

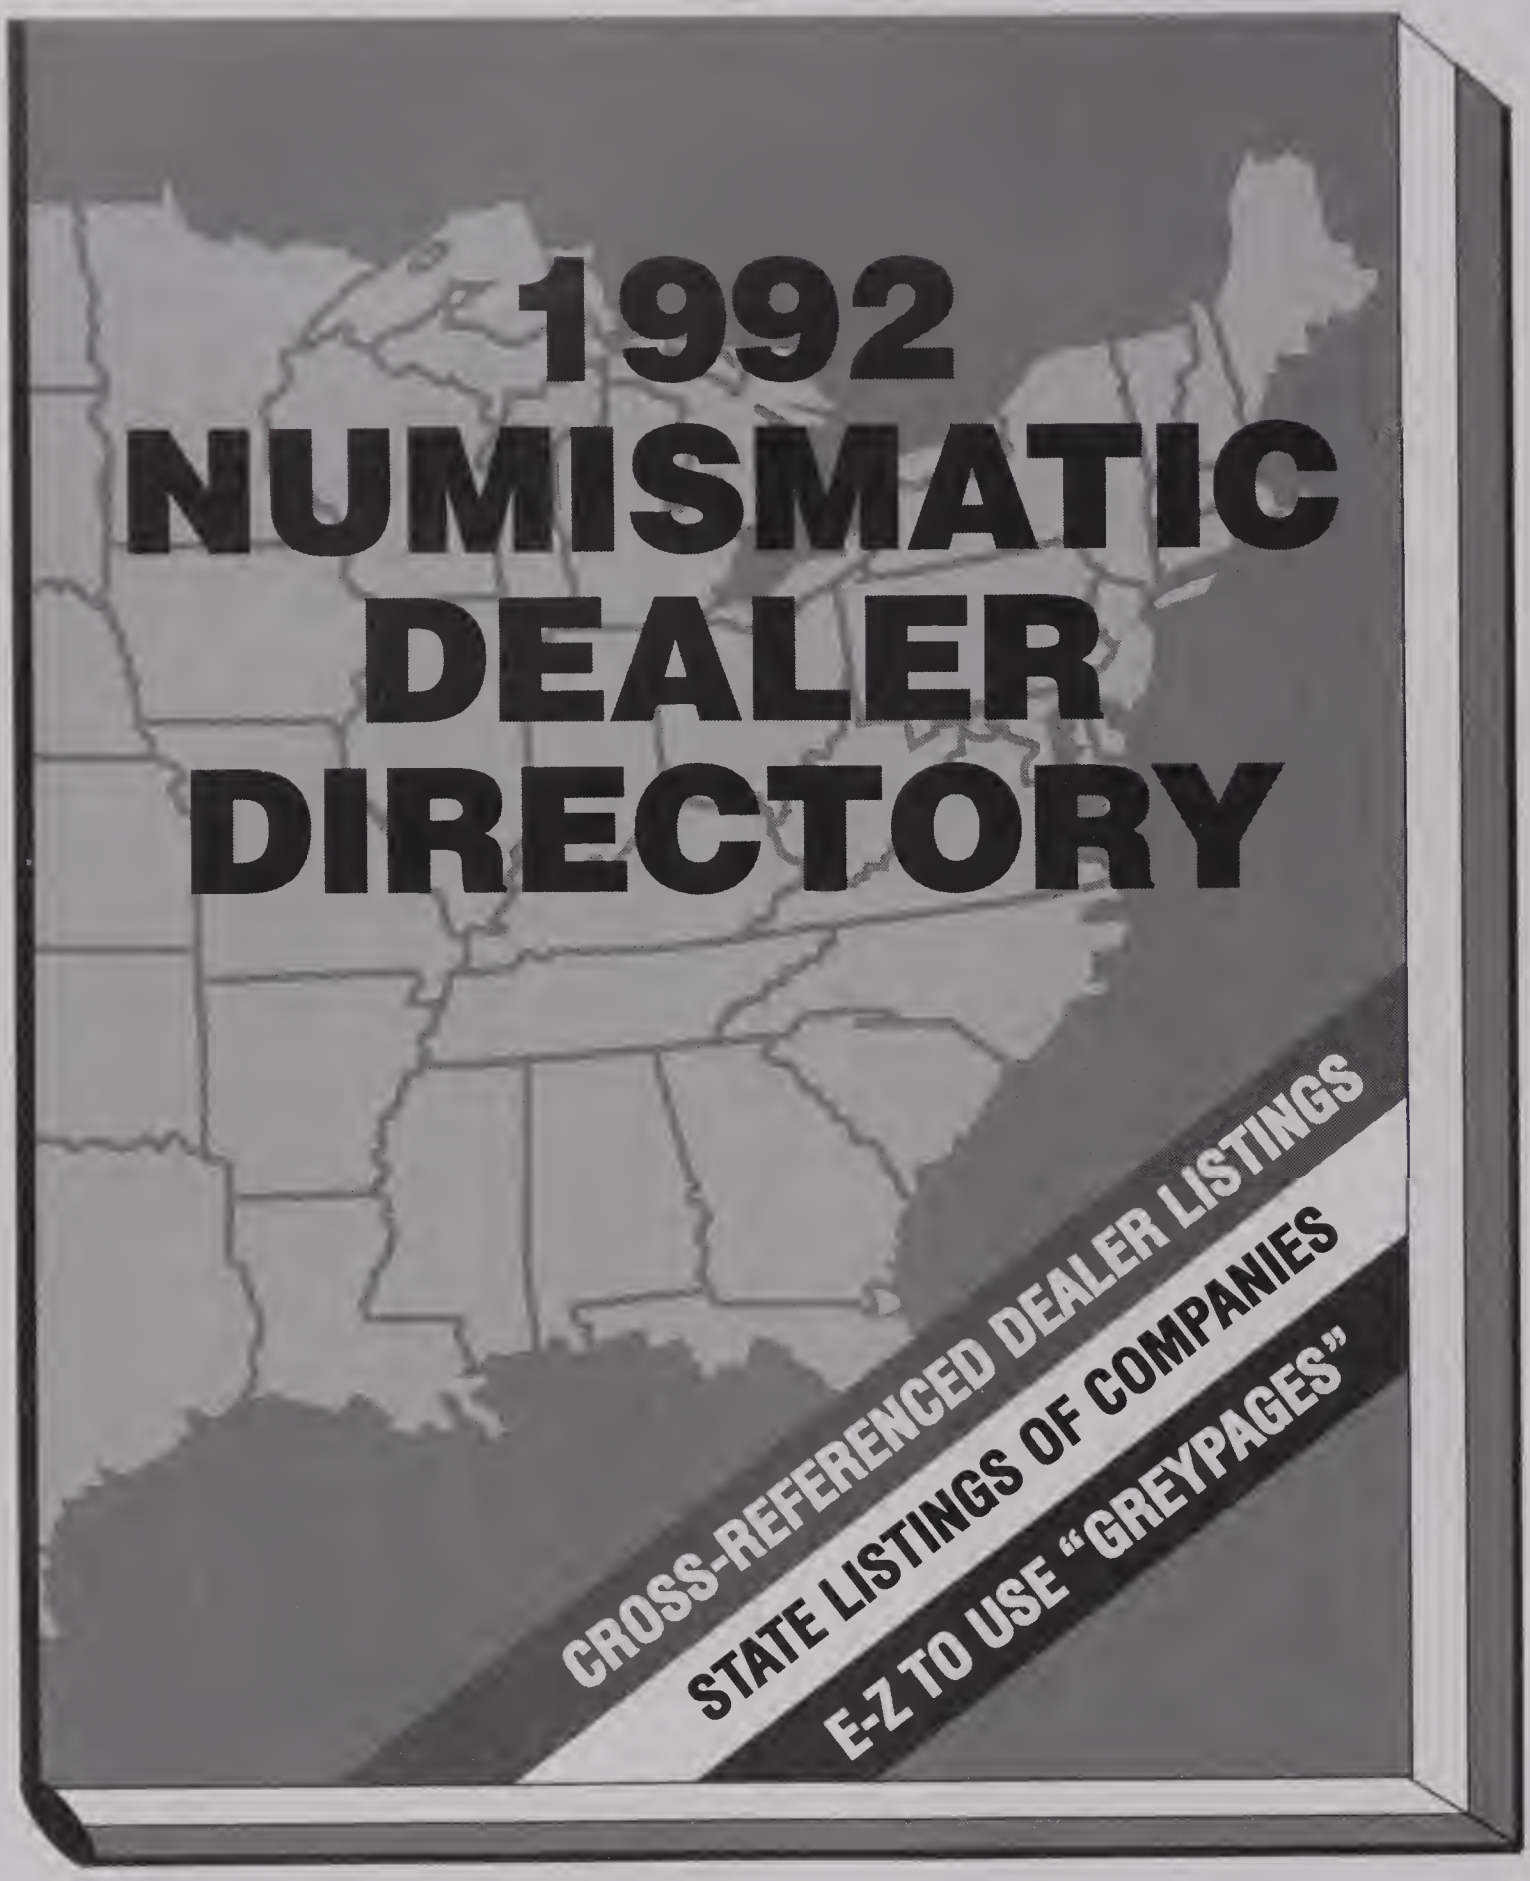
Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 - Unc. - May not have full mint lustre, may be dull, toned or spotted. May be the worst possible example, but shows no wear or damage. Will be bagmarked and/or weakly struck.



MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but il should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU - Far and away nicer than MS-63, yet a near miss MS-65. Few Contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.



MS-65 - Gem BU - Sharp, full strike, full lustre. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade. **Must** have eye-appeal.

MS-67 - Superb. Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Deep Mirror Prooflike - Will exhibit the same characteristics as the corresponding Mint State Morgan, but with the additional feature of deep mirror surfaces on both sides.

the COIN DEALER newsletter

Our 29th year...

Single copy price $3.50 Vol. XXIX No. 48 November 29, 1991 *...a Friday morning report on the Coin Market*

GENERIC SURGE CONTINUES
POPULATION REPORTS HAVE MADE A DIFFERENCE

The Market in Depth

With the Thanksgiving Holiday behind us, dealers are still wondering what kind of a Holiday selling season they will experience. One thing is certain - Holiday demand has yet to take-off for Proof Sets, one of the all-time gift favorites. They are bright, shiny, reasonably priced, and a great introduction to the world of numismatics - in short, Proof Sets make a pretty *special* gift. No, the *problem* is that Proof Sets have been strong all year. In a declining market, Proof Sets had been going against the trend. With prices either steady or rising during the year, it was hoped that Holiday demand might make them a real 'boomer'. Instead, they are again bucking the trend of rising generic Bids, and *declining* at this time. With lowered Asks, we are also seeing some incredibly narrow spreads developing. The spread on the '91 Proof Set is currently TEN CENTS! Hard to make money that way, even if you sell a thousand.

Mint Sets also put in a pretty good year, although they too seem to be showing a little weakness going into the final stretch. For obvious reasons, Mint Sets aren't quite as flashy as Proof Sets, but together the sets make excellent companion gifts to celebrate that new baby, or for the younger collector working on current coinage sets. Maybe the demand is dropping simply because $50 can buy one really nice Morgan Dollar right now, with a lot of flash and history. When it comes to gift-giving, supply and demand forces work as well.

Special thanks to the dealer who asked us to run one of our Page Three charts on MS65 Quarter Eagles. Last week's chart on $1 Gold clearly showed the results of the population reports on perceptions of rarity, and he expected that a comparison of MS65 Liberty $2 1/2 and MS65 Indian $2 1/2 would make the point even stronger. Through mid-1987, Bid on the two Types was so close that the graph lines appear as one. Then, lo and behold, the Indian starts to become "rarer". What caused the divergence? (Hints: PCGS was established in 1986, and the first population reports emerged around April 1987).

How much rarer did the MS65 Indian $2 1/2 become? At the height of the 1989 Rally, Bids were $11,500 and $8,250 - that's a $3,250 difference in rarity/value! Today's prices have returned from the stratosphere, and Bids are currently $3,280 and $1,980. You can now buy a really terrific coin at more reasonable levels, but the percentage of premium is even greater. Dealers understand the shortcomings of the pop reports, but they remain the best rarity tool available, and dealers base their actions on them.

This Week's Market

CENTS THRU HALVES: The BU roll market has been rather quiet this past week. There are very few changes, although there is still some sporadic Bidding support (at current levels) for various issues, especially in the Lincoln Cent area.

DOLLARS: MS65 Morgan Dollars have climbed dramatically this past two weeks as dealers try to outbid each other for available quantities. They are up another 10%+, at $102 Bid. Even the "cheap" sellers have increased their asking prices. This is the kind of momentum the market has been looking for--now if the market can just maintain this upward pressure it may help to improve the long-term appeal of the coin business.

PROOF SETS AND MINT SETS: Proof Sets continue to drop off as potential sellers lower their prices. Many dealers are offering "lot" deals at discounts, just to move unwanted inventory. By itself this does not lower the Bids, but single-date sets are also being offered at lower levels. Mint Sets have found a little more stability as just a few sets are lower, while several are wanted at current Bids.

COMMEMORATIVES: The Commem market is finding activity slightly above average. A few more minus signs than plus signs indicates that there are still buying opportunities out there to be had. Much of the market is steady at today's Bid levels.

TYPE: "Equilibrium" best describes the Type market. Numerous increases more than off-set the small number of declines (both in Mint State and Proof).

GOLD: For the second week in a row, the U.S. Gold market is flourishing. Plus signs are scattered throughout the chart as dealers are trying to buy coins before prices climb to previous levels. Some of the spreads between Bid and Ask have widened as sellers are not quite as anxious to sell as they were before.

EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$384/$390, 1987 1oz-$385/$390, 1/2oz-$182/$193, 1988 1oz-$387/$397, 1/2oz-$185/$200, 1989 1oz-$387/$400, 1/2oz-$220/$260, 1990 1oz-$450/$495, 1/2oz-$250/$268, 1991 1oz-$500/$585, 1/2oz-$280/$315. Proof Silver Eagles are trading at: 1986-$14.25/$16, 1987-$14.25/$16, 1988-$65/$75, 1989-$14/$15.50, 1990-$21/$25, 1991-$22/$25. BU 1986 Silver Eagles wholesale at $10.75/$11.50.

The weekly **COIN DEALER newsletter** (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins **sight-seen**. The coins may be certified or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally; they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight-unseen** market, which already include consideration of certification costs. Bids for a **sight seen** "raw" coin may be higher or lower than for a **sight-unseen** certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder, but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the rolls in the late 50's tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series "gem full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the 5-mint issues) are worth more than listed prices. M5-65 singles may be found in the MONTHLY SUPPLEMENT, Mercury & Walker singles are on Page 10.

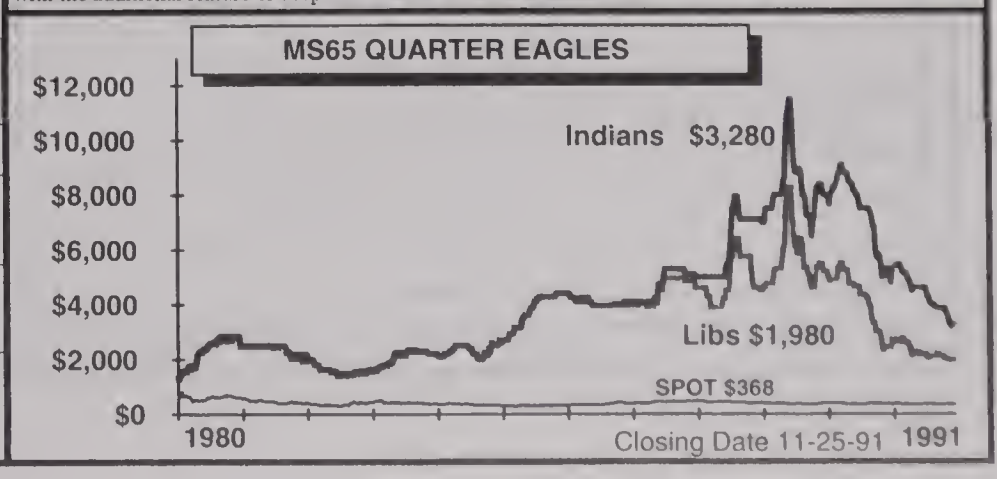
THE GREYSHEET

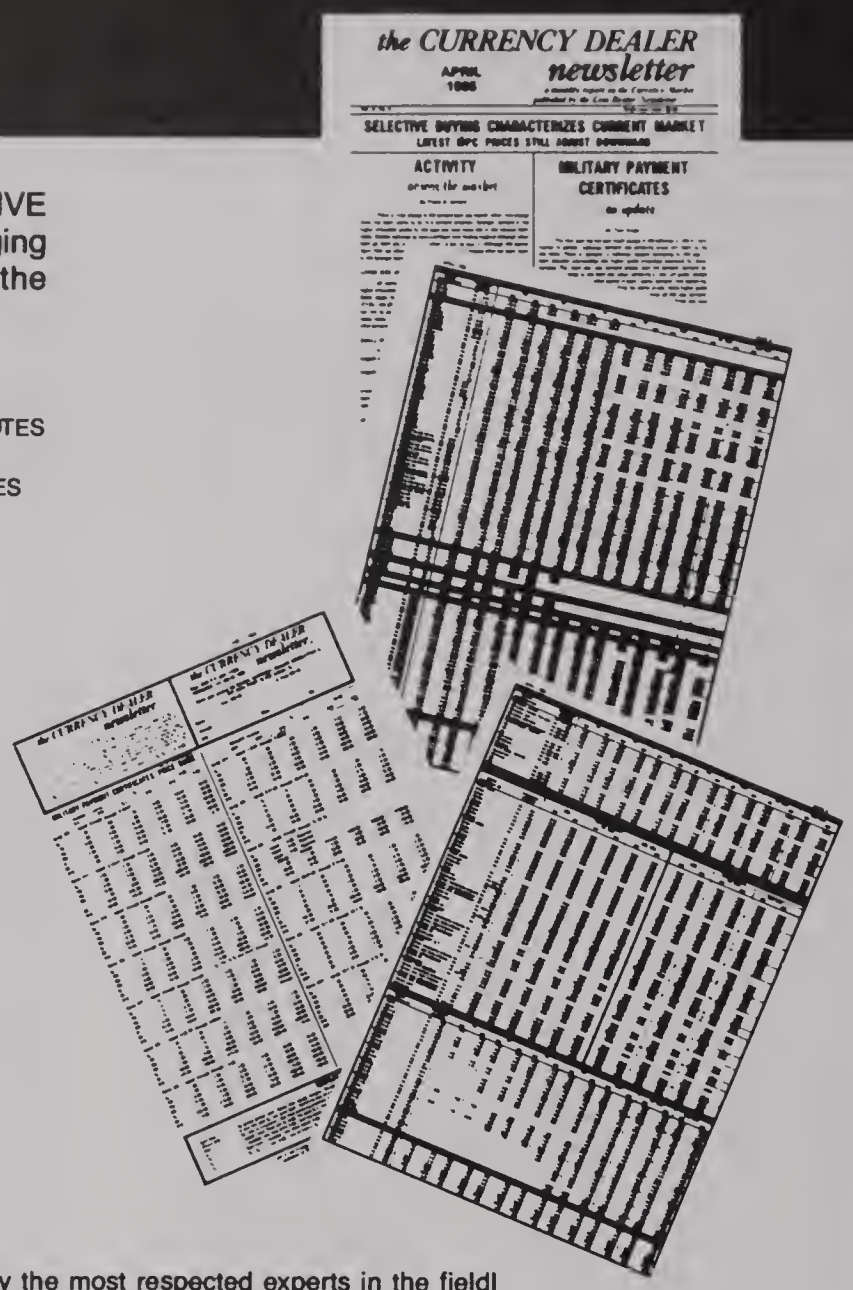
Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 – Unc. – May not have full mint lustre, may be dull, toned or spotted. May be the worst possible example, but shows no wear or damage. Will be bagmarked and/or weakly struck.



MS-63 – Choice BU – Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 – Distinct BU – Far and away nicer than MS-63, yet a near miss MS-65. Few Contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.



MS-65 – Gem BU – Sharp, full strike, full lustre. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade. Must have eye-appeal.

MS-67 – Superb. Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Deep Mirror Prooflike – Will exhibit the same characteristics as the corresponding Mint State Morgan, but with the additional feature of deep mirror surfaces on both sides.

DO YOU WANT TO INCREASE THE VALUE OF YOUR U.S. COINS?

HERE'S HOW TO DO IT:

THE NEW IMPROVED $6 CERTIFIED CAPSULE®
Provides You The Ultimate Tool In Defining The Maximum Value Of Your Coins.

WHAT CAN YOU EXPECT FOR $6?

1. **Accurate, consistent grading . . .** that allows you to look up the value of your coins. Don't sell too cheap or pay too much! Also, if you check around you'll find the new PCI Capsule® is the lowest priced Professional Grading Service in America.
2. **Attribution . . .** PCI recognizes that all coins are not "generic" and provides the sophisticated coin collector and dealer not only with 3rd party unbiased grading, but information you don't receive with other services. For example, we provide Breen, Newcomb, and Bolender numbers. We show die varieties, errors, mintage features and pedigrees. We list on the slab insert specialties like FBL (Full Bell Lines), FB (Full Bands), PL, DMPL, Red, 75% and 90%, FH (Full Head) and a host of others. But best of all . . . the PCI slab has an exclusive on 'PQ' designation. All of this printed on a high security certificate insert designed against counterfeiting or coin switching.
3. **Long term protection against the elements . . .** is provided to you with clear, attractive, museum-quality encasement (slab) that is ultrasonically sealed. (This fact alone could justify the $6.00 fee).
4. **You are the boss at PCI . . .** because we're the ***only*** ones who accept coins from everybody! No trade restrictions here and that's because we trust you to be private and confidential!

If this offer looks exciting to you, then give PCI a try. You may submit raw coins, coins already slabbed by other services, or coins you think could be "Premium Quality".

SIGHT-SEEN BIDDING GETS SUPPORT MECHANISM
DEALERS & COLLECTORS BOTH WANT TO LOOK AT COINS

The Market in Depth

Numismatists have seen some incredible changes in the market during the last ten years. Though few suspected it at the time, certification would generate the most changes. First, dealers who had spent a lifetime looking at and grading coins had to relearn how to "grade" according to new standards. While this in itself was controversial, the end result was that more dealers than ever before agreed on grading - and that can only be viewed as a market plus. Then, under the influence of the more efficient electronic exchanges, dealers had to learn to like to trade coins **sight-unseen;** some never did learn to like it. The ***Greysheet***, being just a little-bit *'old-fashioned'*, thought that collectors (and consequently, their dealers) would prefer to transact coin business **sight-seen**, and continued to list those Bids accordingly.

For a time, during the first three years of life in *slabdom*, rising prices in the coin market were often dictated by consistently rising Bids on **sight-unseen** coins. Dealers recognized that this was definitely a case of the tail wagging the dog, but what could be done when Bids on the tails were higher than on the complete canines? Dealers were still willing *to pay more to examine the material*, but the price discovery mechanism favored the electronic **sight-unseen** Bid, and it became necessary to factor these into CDN prices. Then, after enormous quantities of coins were certified, and it was realized that the market was not sufficiently liquid to support Bids on all of them, **sight-seen** Bidding again came to dominate the market on all but the most generic of coins.

This week's introduction of **sight-seen** bidding on ATC's Certified Coin Exchange may again mark a change in the way the market runs, for raw coins as well as certified. With the ability to Bid without having to worry about receiving a coin you don't want (just return it!), dealers may be able to provide more market support; certainly more than they had been willing in the past. We will know shortly just how successful the **sight-seen** option will be; we expect great things anytime modern technology allows dealers to operate the *'old-fashioned'* ways that they always preferred.

This Week's Market

CENTS THRU HALVES: Numerous BU rolls are lower this week due to discounted sells. Most of the declines were in the 1953 to 1960 time-frame (Nickels thru Halves); the Lincoln Cents found further weakness in the 1944 to 1949 issues.

DOLLARS: Over the last couple of weeks, the Dollar market has jumped considerably for common MS65 dates. They are now up to $112 Bid compared to $80 Bid for a brief moment in mid-November. This is creating further activity in other 65 issues along with numerous 64s. Some dealers are reporting that the climb in price is causing an increase in sales to "new" buyers. Yahoo!

PROOF SETS AND MINT SETS: Proof Sets continue to falter as sellers are more visible than buyers. For the most part, the only buyers that we have monitored recently are looking for bargains. Mint Sets are a little more steady, yet, there are still minuses to be found.

COMMEMORATIVES: Gold and Silver Commems both remain active at current Bid levels. Buying pressure has forced several Silver issues to a higher status this week, while just a few common issues have been discounted. Many of the discounted issues are trading at the new levels.

TYPE: The Type market looks moderately sound as the majority of changes are to the upside. Even those issues where no changes occurred this week seem to be steady at today's levels. As we monitor the teletype systems, we can see a growth in the number of Bidders trying to purchase Type coins.

GOLD: While a few minus signs have popped up this week in the U.S. Gold chart, the bulk of modifications are rising due to more dealers competing for the available supply of specific issues. Mint State coins seem to be appearing on more want lists, which in turn causes the potential sellers to raise their Ask prices.

EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$385/$392, 1987 1oz-$385/$395, 1/2oz-$185/$200, 1988 1oz-$390/$410, 1/2oz-$186/$200, 1989 1oz-$390/$425, 1/2oz-$220/$260, 1990 1oz-$435/$490, 1/2oz-$250/$275, 1991 1oz-$500/$585, 1/2oz-$280/$315. Proof Silver Eagles are trading at: 1986-$14/$16.50, 1987-$14/$16, 1988-$65/$75, 1989-$14/$15, 1990-$22/$26, 1991-$22/$25. BU 1986 Silver Eagles wholesale at $10.75/$11.50.

The weekly **COIN DEALER newsletter** (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins **sight-seen**. The coins may be certified or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally; they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight-unseen** market, which already include consideration of certification costs. Bids for a **sight seen** "raw" coin may be higher or lower than for a **sight-unseen** certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder, but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions; you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the rolls in the late 50's tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the 5-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUPPLEMENT; Mercury & Walker singles are on Page 10

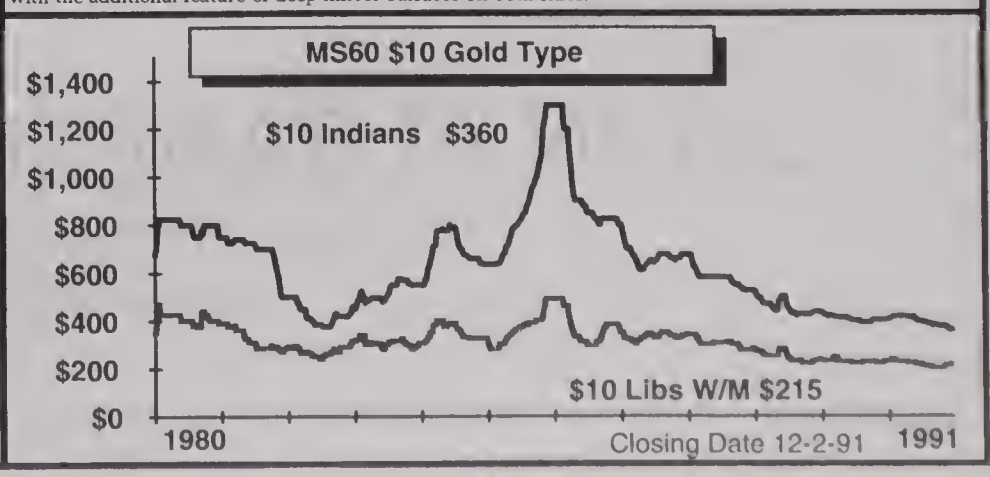
THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

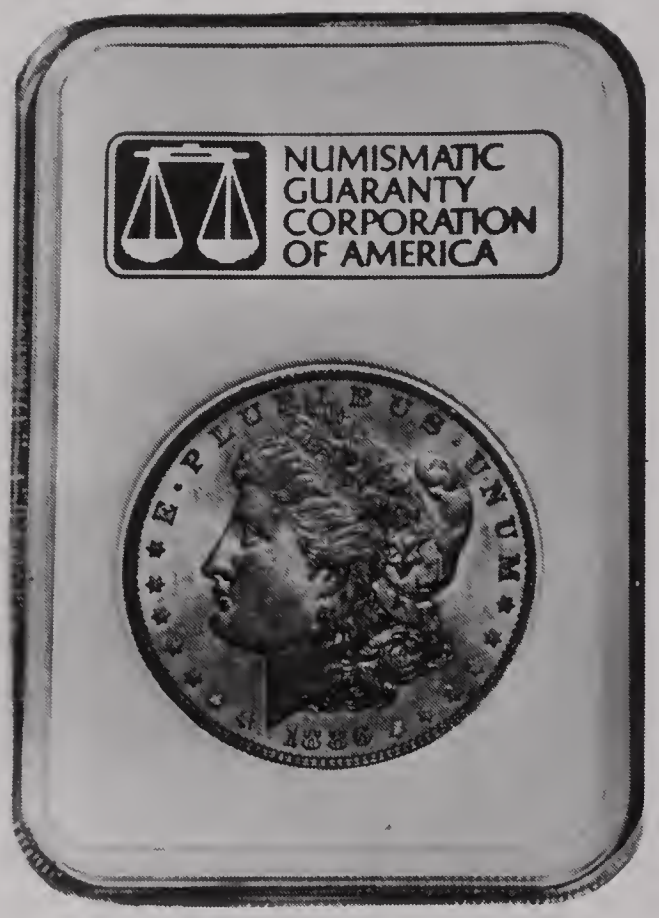
MS-60 – Unc. – May not have full mint lustre, may be dull, toned or spotted. May be the worst possible example, but shows no wear or damage. Will be bagmarked and/or weakly struck.



MS-63 – Choice BU – Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 – Distinct BU – Far and away nicer than MS-63, yet a near miss MS-65. Few Contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 – Gem BU – Sharp, full strike, full lustre. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade. **Must** have eye-appeal.



MS-67 – Superb. Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Deep Mirror Prooflike – Will exhibit the same characteristics as the corresponding Mint State Morgan, but with the additional feature of deep mirror surfaces on both sides.

YEAR-END PICK ME UP: MS65 MORGANS
SUPPLY & DEMAND FORCES MOVE MARKET

The Market in Depth

What makes an MS65 Morgan Dollar, *that most generic of coins*, **worth** $118? When *one* trades at $118? With a population approaching one-quarter million, that doesn't seem appropriate. Nor if a *dozen* or so sell. A *gross* of them at a higher or lower price might get our attention. But ***sell a few thousand pieces***, and by golly, $118 is the new price, all right. No question about it. Our advice to dealers is to simply forget what they were worth two months ago, and concentrate on the present demand that is translating into a **value** of $118. To be sure, they may go up or down in the future, but during this Holiday season MS65 Morgans are **worth** $118 to the wholesale buyers.

The strong movement of Morgans seems to be breathing some new life into the market. Plus signs are scattered across the charts, although discounted sells are continuing to produce minus signs. We aren't hearing any dealers making predictions about a return of the Bull market, but any upward activity is producing an audible sigh of relief. Hopefully, dealers will be able to build upon this good news to lay the foundation for beginning a market rally. Dealers have had quite enough bad news of late to last them for some time, thank you; a bit of good news is just what the market needs most. Hopefully, collectors will be equally buoyed by these events and begin to move some fresh cash into the market.

This week's Page Three chart follows the Bid pricing history of two favorite Type coins, the MS65 3-Cent Nickel and 3-Cent Silver Type III coins. Here are two coins that can win the attention of even the most jaded neighbor, and are sure to start an exciting discussion on the continuing theme of Congress and coinage. Currently Bid at price levels comparable to 1980, either coin has given the investor a lot of thrill for the price. The premium paid for the 3-Cent Silver during the first half of the 'Eighties was relatively constant until the 1985 advance; after the population reports became a key numismatic reference, the spread between the two coins narrowed substantially. Today, both coins are available at incredibly reasonable levels, with a premium for the Silver among the lowest in a decade.

This Week's Market

CENTS THRU HALVES: BU rolls continue to be somewhat sluggish as the majority of changes are downward. Various Lincoln Cent rolls have fallen due to excessive availability. Most of the early rolls in the Lincoln and Washington series are steady at current levels.

DOLLARS: Dollars are very active at today's levels as a result of increased Bidding on the part of several major dealers. The $118 Bid on generic Morgans is having a strong carryover effect on other issues and grades. If the marketplace gets much more excitement in the next couple of weeks, the new year could start out with a bang.

PROOF SETS AND MINT SETS: Proof and Mint Sets are beginning to amaze even the most stalwart of followers. This is not the desired result the year-end holidays are supposed to have on these issues. More minus signs are scattered in and around the charts. And until this week, Mint Sets were not as heavily discounted. Now, their weakness is readily apparent and contagious.

COMMEMORATIVES: Many dealers are taking advantage of what they feel are very reasonable prices for numerous Silver Commems. Plus signs can be found throughout the Commem chart, for MS64 and 65 issues. Even the few issues which have fallen this week, seem to be moving at these new levels.

TYPE: The Type market is mixed, as it has been for the last several weeks. The only difference this week is that it is slightly biased toward the downside. However, we are receiving reports that dealers are looking for properly graded coins at appropriate price levels. Proof issues appear to be stronger than Mint State at today's levels.

GOLD: Mint State U.S. Gold seems to be following the same pattern as Dollars and Commems. The majority of issues are steady at current Bids, with several having moved higher this past week. The few issues which have dropped seem to be active at the new levels.

EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$386/$392, 1987 1oz-$387/$394, 1/2oz-$185/$200, 1988 1oz-$390/$410, 1/2oz-$186/$200, 1989 1oz-$390/$425, 1/2oz-$220/$260, 1990 1oz-$435/$500, 1/2oz-$250/$275, 1991 1oz-$500/$580, 1/2oz-$280/$310. Proof Silver Eagles are trading at: 1986-$14/$16.50, 1987-$14/$16, 1988-$65/$72, 1989-$14/$16, 1990-$21/$25, 1991-$22/$24.50. BU 1986 Silver Eagles wholesale at $10.50/$11.50.

The weekly **COIN DEALER newsletter** (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins **sight-seen**. The coins may be certified or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally; they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight-unseen** market, which already include consideration of certification costs. Bids for a **sight seen** "raw" coin may be higher or lower than for a **sight-unseen** certified coin due to current market conditions. The **CDN** may not change Bid due to the bidding adjustments of the high bidder, but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions; you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the rolls in the late 50's tend to be dark—these bring lower prices, "gem, full steps" rolls (when available) bring higher prices. In the Mercury series "gem full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUPPLEMENT. Mercury & Walker singles are on Page 10

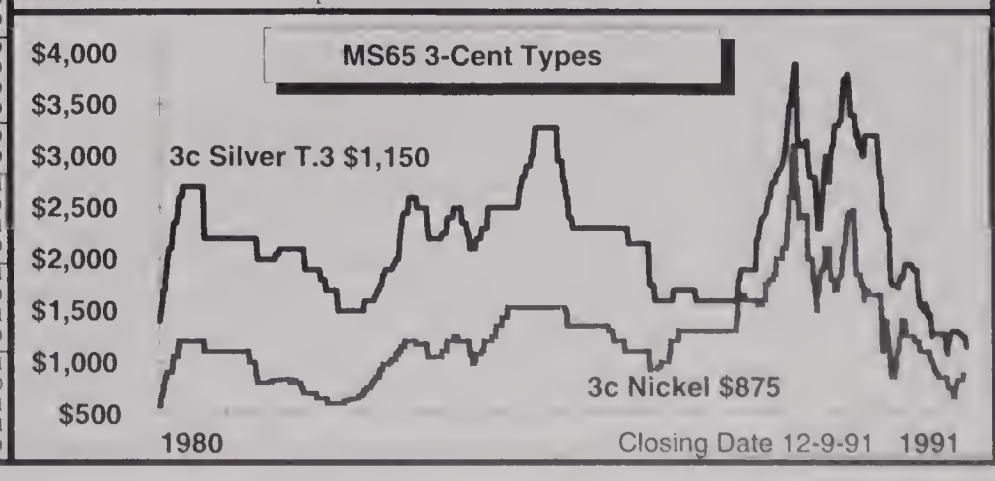
THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 – Unc. – May not have full mint lustre, may be dull, toned or spotted. May be the worst possible example, but shows no wear or damage. Will be bagmarked and/or weakly struck.



MS-63 – Choice BU – Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 – Distinct BU – Far and away nicer than MS-63, yet a near miss MS-65. Few Contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 – Gem BU – Sharp, full strike, full lustre. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade. **Must** have eye-appeal.

MS-67 – Superb. Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Deep Mirror Prooflike – Will exhibit the same characteristics as the corresponding Mint State Morgan, but with the additional feature of deep mirror surfaces on both sides.

DO YOU WANT TO INCREASE THE VALUE OF YOUR U.S. COINS?

HERE'S HOW TO DO IT:

THE NEW IMPROVED $6 CERTIFIED CAPSULE®

Provides You The Ultimate Tool In Defining The Maximum Value Of Your Coins.

WHAT CAN YOU EXPECT FOR $6?

1. **Accurate, consistent grading** . . . that allows you to look up the value of your coins. Don't sell too cheap or pay too much! Also, if you check around you'll find the new PCI Capsule® is the lowest priced Professional Grading Service in America.
2. **Attribution** . . . PCI recognizes that all coins are not "generic" and provides the sophisticated coin collector and dealer not only with 3rd party unbiased grading, but information you don't receive with other services. For example, we provide Breen, Newcomb, and Bolender numbers. We show die varieties, errors, mintage features and pedigrees. We list on the slab insert specialties like FBL (Full Bell Lines), FB (Full Bands), PL, DMPL, Red, 75% and 90%, FH (Full Head) and a host of others. But best of all . . . the PCI slab has an exclusive on 'PQ' designation. All of this printed on a high security certificate insert designed against counterfeiting or coin switching.
3. **Long term protection against the elements** . . . is provided to you with clear, attractive, museum-quality encasement (slab) that is ultrasonically sealed. (This fact alone could justify the $6.00 fee).
4. **You are the boss at PCI** . . . because we're the ***only*** ones who accept coins from everybody! No trade restrictions here and that's because we trust you to be private and confidential!

If this offer looks exciting to you, then give PCI a try. You may submit raw coins, coins already slabbed by other services, or coins you think could be "Premium Quality".

Our 29th year...

DOLLARS BRIGHTEST NOTE AT YEAR'S END
LAST *GREYSHEET* FOR 1991

The Market in Depth

This is the last issue of the *Greysheet* for 1991. There will be many dealers who rejoice at having survived such a difficult year. There are even a few, who having cultivated a collecting clientele over many years, actually turned a profit. There will be no one boasting about their spectacular growth. And some retail dealers can be found wondering at the virtual disappearance of Holiday sales.

It is one of the great curiosities of this business that the coins always remain the same. They may be packaged differently; they may be slabbed; they may be reslabbed; they may be priced higher or lower. But in the final analysis, it all comes down to the coin and the customer. Supply and demand. If you have a customer for the coin, and the coin is attractive and priced right, you have a sale. If the coin is unattractive, or priced too high, you have a problem. In an inventory-based business, the key to success lies in the number of inventory turns. A coin that sits in inventory all year long, especially during a declining market, just keeps losing theoretical value; if it is overpriced at each new successive lower level, you may never see a profit created from that capital investment.

While it may sound like a contradiction, today is also an excellent time to be buying coins and setting them aside - at least, it is for the collectors and dealers who can afford to think long-term. A long-term perspective translates into the opportunity to buy really attractive coins at prices that are incredibly low. In many cases, coins are selling for their lowest adjusted prices in a decade. Every numismatist knows that coin prices are cyclical, and that we are approaching a market bottom. Some coins might be there already; can you remember when MS65 Morgans were Bid as low as $80? We may not have reached the 'bear bottom' yet, but you can bet that once the rebound begins, the nicest coins will disappear off the market so fast it will make heads spin. When the right coin comes along at the right price, do your customers a favor, and persuade them to buy; will it make much difference whether their long-term profit is 290% or 300%?

Remember, this is the last issue of the Coin Dealer Newsletter for 1991; our next issue will be dated Jan. 3, 1992. The staff of the CDN family of Publications wishes you and yours a happy & safe Holiday.

This Week's Market

CENTS THRU HALVES: The market for BU rolls continues sluggish as information is reported which results in the lowering of specific dates. As you can see on Page 3, nearly every series has multiple declines. The series which has the most declines is Franklin Halves, with the Washington (mostly late-dates) series right behind it.

DOLLARS: Despite the fact that common MS65 Dollars are lower this week, the news is not all bad. Common MS63 & 64 issues are stable at current Bids; and while the 65 issues are at $106 (lower), they are solid at this level. Informed sources report the major marketer of 65 coins is still in need of these coins, but is allowing the market to "rest" before pursuing the balance of their needs.

PROOF SETS AND MINT SETS: Thank goodness for little favors! The Proof and Mint Sets charts are **not** covered with minus signs this week. In fact, Proof Sets are showing a few increases. This may not be much, but it is a heck of a lot better than recent charts.

COMMEMORATIVES: Even though most dealers look for pluses and minuses in the charts, the changes do not always tell the whole story. For instance, most of the Silver Commems in MS64 and lower grades are steady at current levels with various dealers trying to buy quantities. The few minuses, including the MS65 grade, are mostly nominal declines. Further, the MS65 column also displays assorted increases.

TYPE: Proof Type is quite steady with several issues exhibiting plus signs. However, Mint State Type does not enjoy the same comfort. While there are some increases, the majority of changes are to the downside. We are seeing more sellers than buyers.

GOLD: MS63 and 64 U.S. Gold have suddenly become very popular with dealers. We understand that this could be a result of future marketing plans like the one we just witnessed with Morgans. Inasmuch as dealers like to hear good news and then react accordingly, the current rash of increases could be a telling indicator of upcoming events.

EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$374/$380, 1987 1oz-$376/$388, 1/2oz-$180/$195, 1988 1oz-$380/$395, 1/2oz-$180/$200, 1989 1oz-$385/$425, 1/2oz-$215/$260, 1990 1oz-$430/$475, 1/2oz-$245/$270, 1991 1oz-$490/$570, 1/2oz-$275/$310. Proof Silver Eagles are trading at: 1986-$14.75/$16.50, 1987-$14.50/$16, 1988-$63/$72, 1989-$14/$16, 1990-$20/$25, 1991-$22/$24.50. BU 1986 Silver Eagles wholesale at $10.25/$11.00.

The weekly **COIN DEALER newsletter** (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins **sight-seen**. The coins may be certified or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally; they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight-unseen** market which already include consideration of certification costs. Bids for a **sight seen** "raw" coin may be higher or lower than for a **sight-unseen** certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder, but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer to-Dealer transactions, you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the rolls in the late 50's tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series "gem full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUPPLEMENT; Mercury & Walker singles are on Page 10.

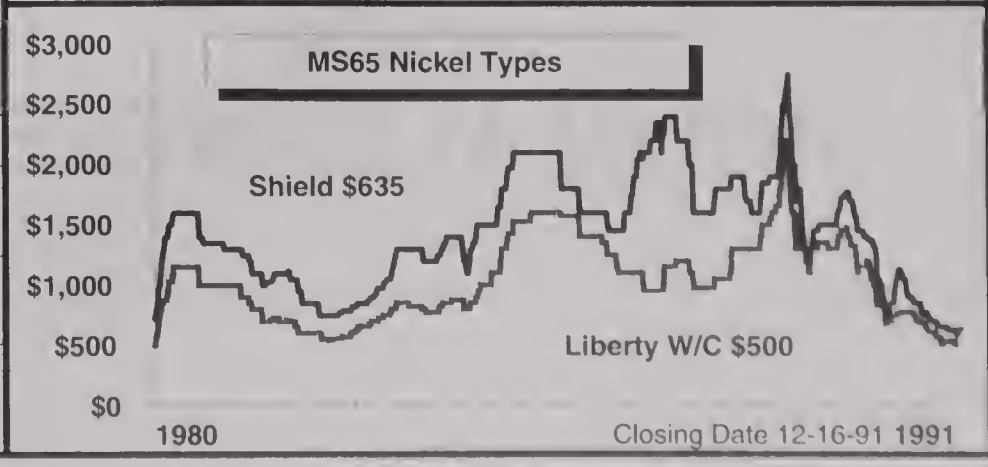
THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

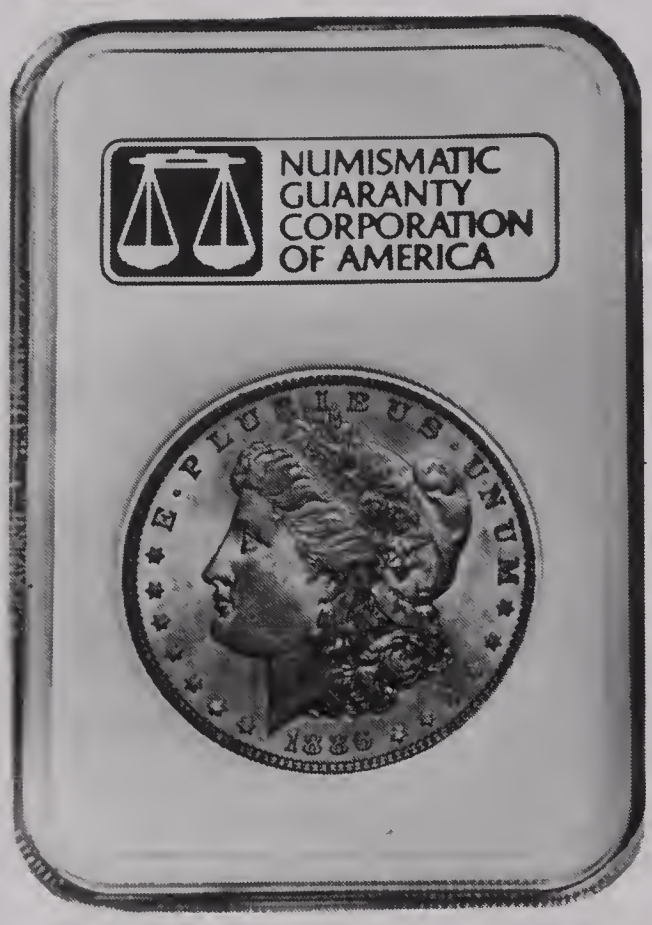
MS-60 – Unc. – May not have full mint lustre, may be dull, toned or spotted. May be the worst possible example, but shows no wear or damage. Will be bagmarked and/or weakly struck.



MS-63 – Choice BU – Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 – Distinct BU – Far and away nicer than MS-63, yet a near miss MS-65. Few Contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 – Gem BU – Sharp, full strike, full lustre. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade. **Must** have eye-appeal.



MS-67 – Superb. Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Deep Mirror Prooflike – Will exhibit the same characteristics as the corresponding Mint State Morgan, but with the additional feature of deep mirror surfaces on both sides.
